

OSHA CONSULTANTS HEALTH, SAFETY & TRAINING

www.oshacomplianceconsultant.com →→

Worker safety is essential to running a successful business. A safety consultant can help businesses ask and think through essential questions to create a safe work environment.

Even if your business has not had any work-related injuries or fatalities, evaluating your workplace for safety hazards is important.

Workplace Safety

We offer a complete range of safety and health management services. Talk to our experts about safety and health assessments and consulting, wall-to-wall inspections, environmental studies, compliance, machine guarding, custom innovative solutions and more.

Safety Training

Ensure your employees' complete safety competency. Choose training that works for you: on-site, off-site or virtual programs are available. Full range of safety education from toolbox safety to OSHA 10-30 hr certification.

OSHA Representation

Whether you are in the middle of an inspection or need qualified expert support at OSHA hearings, we are well equipped and prepared to handle any situation. Let our experts' knowledge, experience and tenacity protect your interests and your business
