Managed Data Security

January, 2024

Service Overview:

MarcViews Networks offers Managed Data Security services tailored specifically for small businesses, providing comprehensive protection for sensitive data assets. Our solution combines industry-leading standards, frameworks, and tools to safeguard your data against cyber threats, compliance risks, and unauthorized access, allowing you to focus on your core business objectives with confidence.

Key Features:

☐ **24/7 Monitoring and Threat Detection:** Our Security Operations Center (SOC) experts monitor your data environment round-the-clock, utilizing advanced threat detection technologies to identify and mitigate potential security incidents in real-time.

☐ **Comprehensive Compliance Management:** We ensure that your small business meets regulatory compliance requirements by implementing relevant standards and frameworks, such as GDPR, HIPAA, PCI DSS, and ISO 27001.

☐ **Data Encryption and Tokenization:** Robust encryption and tokenization techniques are applied to protect sensitive data at rest and in transit, minimizing the risk of unauthorized access and data breaches.

☐ **Identity and Access Management (IAM) Controls:** Granular IAM controls are implemented to manage user access privileges and enforce least privilege

principles, reducing the likelihood of insider threats and unauthorized data access.

- ☐ **Vulnerability Management:** Regular vulnerability assessments and patch management are conducted to identify and remediate security weaknesses within your data environment, minimizing the risk of exploitation by cyber attackers.

- ☐ **Endpoint Protection:** We deploy endpoint security solutions to protect devices and endpoints against malware, ransomware, and other malicious threats, ensuring comprehensive protection across your small business network.

- ☐ **Security Awareness Training:** We provide security awareness training programs for your employees to educate them about cybersecurity best practices and raise awareness about common threats, helping to prevent social engineering attacks and human errors.

Relevant Standards, Frameworks, and Tools used by our team:

- ☐ **GDPR (General Data Protection Regulation):** Ensures compliance with data protection requirements for EU citizens' personal data.

- ☐ **HIPAA (Health Insurance Portability and Accountability Act):** Ensures compliance with healthcare data privacy and security regulations.

- ☐ **PCI DSS (Payment Card Industry Data Security Standard):** Ensures compliance with security standards for handling credit card information.

- ☐ **ISO 27001 (International Organization for Standardization):** Provides a framework for establishing, implementing, maintaining, and continually improving an information security management system (ISMS).

- ☐ **Security Information and Event Management (SIEM) Tools:** Utilized for log management, threat detection, and incident response.

- ☐ **Data Loss Prevention (DLP) Solutions:** Used to prevent unauthorized access, exfiltration, or misuse of sensitive data.

☐ **Endpoint Detection and Response (EDR) Solutions:** Deployed for real-time endpoint security monitoring and threat response.

Key Benefits:

☐ **Peace of Mind:** Our Managed Data Security service offers small businesses peace of mind, knowing that their sensitive data is protected against cyber threats and compliance risks.

☐ **Cost-Effective Solution:** By outsourcing data security management to MarcViews Networks, small businesses can avoid the costs associated with hiring and training in-house security personnel.

☐ **Expert Support:** Access to our team of dedicated security experts ensures prompt incident response and resolution, minimizing downtime and potential impact on business operations.

☐ **Improved Compliance:** We help small businesses achieve and maintain compliance with relevant regulatory requirements, reducing the risk of fines and legal penalties.
