

Managed Endpoint Protection

January, 2024

Service Overview:

MarcViews Networks offers **Managed Endpoint Protection (EPP)** services designed to safeguard endpoints across your organization's network. Our comprehensive EPP solution combines advanced threat detection, prevention, and response capabilities to mitigate cybersecurity risks and protect against a wide range of endpoint-based threats, including malware, ransomware, and zero-day attacks.

Key Features:

- ☐ **Real-time Threat Detection:** Our EPP solution utilizes advanced threat detection technologies to identify and block malicious activities in real-time, helping to prevent cyber threats from infiltrating endpoints and compromising your organization's security.
- ☐ **Behavioral Analysis:** We employ behavioral analysis techniques to detect and mitigate suspicious behavior patterns indicative of malware or other malicious activities, enhancing the efficacy of threat detection and response.
- ☐ **Signature-based and Behavioral-based Protection:** Our EPP solution combines signature-based and behavioral-based protection mechanisms to effectively detect and block known and unknown threats, ensuring comprehensive endpoint security coverage.

- ☐ **Endpoint Firewall:** We deploy endpoint firewalls to monitor and control inbound and outbound network traffic, preventing unauthorized access and communication with malicious entities.
- ☐ **Endpoint Quarantine and Remediation:** In the event of a security incident, our EPP solution automatically quarantines compromised endpoints and initiates remediation actions to contain the threat and restore affected systems to a secure state.
- ☐ **Centralized Management Console:** Our centralized management console provides administrators with visibility and control over endpoint security policies, allowing for efficient policy management, configuration, and monitoring across the organization's endpoint infrastructure.
- ☐ **Integration with SIEM and Threat Intelligence Feeds:** We integrate our EPP solution with Security Information and Event Management (SIEM) platforms and threat intelligence feeds to enrich threat detection capabilities and facilitate proactive incident response.

Benefits:

- ☐ **Comprehensive Endpoint Protection:** Our EPP solution offers comprehensive protection against a wide range of endpoint-based threats, including malware, ransomware, and zero-day attacks, reducing the risk of security breaches and data loss.
- ☐ **Improved Threat Detection and Response:** Real-time threat detection and behavioral analysis capabilities enable rapid identification and response to security incidents, minimizing the impact of cyber threats on organizational operations.
- ☐ **Enhanced Operational Efficiency:** Centralized management and automated remediation streamline endpoint security operations, allowing organizations to optimize resource utilization and focus on core business activities.

- ☐ **Cost Savings:** Outsourcing endpoint protection to MarcViews Networks eliminates the need for investing in dedicated endpoint security infrastructure and personnel, resulting in cost savings for organizations.
- ☐ **Peace of Mind:** With our Managed EPP solution, organizations can have peace of mind knowing that their endpoints are protected by industry-leading security technologies and expert SOC analysts.

Why MarcViews Networks?

As a trusted MSSP with extensive experience in cybersecurity, MarcViews Networks is committed to delivering tailored endpoint protection solutions designed to meet the unique needs of organizations. Contact us today to learn more about how our Managed Endpoint Protection (EPP) services can help enhance your organization's cybersecurity posture and protect against emerging threats.
