

South American Subbasin (SASb) Noon Lunchtime Briefing - Final Draft 5-Year Periodic Evaluation - June 23, 2026

YOU ARE INVITED

Final Draft 5-Year Periodic Evaluation

State of the South American Subbasin Groundwater

The South American Subbasin Groundwater Sustainability Agencies (GSAs) are wrapping up a 5-Year Period Evaluation of the how groundwater management has worked in the subbasin. The evaluation acts as a comprehensive "check-up" to assess whether the local Groundwater Sustainability Plan (GSP) remains effective and is on track to avoid undesirable results by 2040. Once complete, the evaluation will be submitted to the California Department of Water Resources for their review prior to the due date in January 2027.

During this briefing you will learn more about:

- What the State Requires
- New Information Collected
- Groundwater Conditions Relative To Sustainable Management Criteria.
- Status Of Projects And Management Actions.
- Basin Setting Based On New Information Or Changes In Water Use.
- Monitoring Networks.
- GSA Authorities And Enforcement Actions.
- Outreach, Engagement, And Coordination With Other Agencies.
- Proposed Or Completed Revisions To Plan Elements.
- Questions
