

BEE HOTEL INFO

Created By
Clancy Lester

-  Australia has 2000+ native bee species, >95% are solitary (and don't make honey)
-  70% nest in the ground in clay banks and firm sandy soils
-  30% nest in pithy/hollow stems and holes of wood boring grubs
-  80% of the world's flowering plants need pollinators to reproduce.
-  1 in 3 bites of food is because of pollinators (things like avocado, almonds, tomato)

??? WHAT USES WHAT ???

Native Hardwood

Grass
Carrying
Wasps –
Isodontia

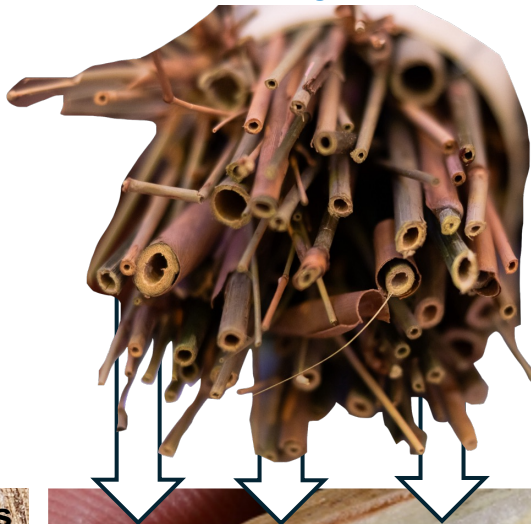

Wasp
Mimic
Bees –
Hyleoides

Resin Bees – *Megachile*

Reeds/Pithy stems

Reed Bees –
Exoneura

Leafcutter Bees – *Eutricharaea*

Masked Bees – *Hylaeus*

Bare Ground/Clay Block

Sweat/Furrow Bees –
Lasioglossum

Cuckoo Bee –
Thyreus

Blue Banded Bee – *Amegilla*
