

STUDIO  
LUMEN

## About Us

Since our formation in 2003 our goal at Studio Lumen has been to use lighting to showcase the uniqueness of individual spaces and structures. We believe that lighting should complement architecture and ambiance rather than draw undue attention to itself so our designs feature a seamless integration with the visual environment both in terms of the lit effect and the material substance of the light fixtures themselves, both at night and during the day. Moreover, we are concerned that the function of the lighting should be seen both to aesthetically enhance the environment, and to meet any more formal requirements such as local and state energy requirements, as well as safety and security.

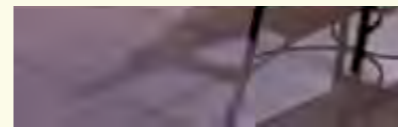

## Our Vision

At Studio Lumen we consider it a matter of good practice and not simply regulatory compliance that we seek to reduce energy use at all times. This does not mean the slavish adoption of 'energy efficient' sources, however. Rather, we consider the quantity and quality of light, and aim not only for a well engineered solution but also one with the flair that our clients expect of us.

Finally, we are proud of an aptitude for teamwork: the creative whole is no greater than the sum of its constituent parts, and it is with this in mind that we feel we can best achieve our primary objective: the fulfillment of the owners' and architects' vision, and the indulgence of the visitor to these spaces.
