Our Past Performance

Defense Logistics Agency (DLA)

- Program management for enterprise software, mobility, and directory services (implementation, integration, patch management, and tier 3 technical support).
- SETA support for Enterprise Financial Management Portfolio: systems engineering, business analytics, enterprise architecture.
- Systems engineering, acquisition, and performance management support for the Enterprise Business System portfolio.
- Process standardization to decrease the use of customized software objects.
- Enterprise policy and process management for IT services, and Lean Six-Sigma continuous process improvement (CPI).

United States Coast Guard

- Applied DOTMLPF-P analysis, Lean Six-Sigma tools, DoDAF, and BPMN to model and improve processes.
- Developed policies and process guides for requirements management, configuration management, and technical data.

United States Air Force

- Developed a Model Based Systems Engineering (MBSE) Style Guide to implement models compliant with the Unified Architecture Framework (UAF).

Our Partners

We work seamlessly with our partners to flex our capacity with additional staff and capabilities for any size project. Our partners are cleared, have exceptional credentials, strong past performance, and share our commitment to excellence.
