WHAT IS CANICROSS?

Canicross, or cross-country trail running with dogs, came about when the dog sledding community needed a way to cross-train their teams in the off-season. Canicross grew first in popularity in Europe, with the United Kingdom really leading the movement to legitimize the sport.

North American Canicross defines canicross as the sport of cross country trail running with dogs. Canicross can be run with one or two dogs, always attached to the runner. The dog(s) wear a non-restrictive, free-motion harness that attaches near the base of the dog's tail to a bungee cord or elastic line. The human teammate is attached to the dog(s) by a hands-free waist belt.

WHO IS NACC?

North American Canicross (NACC) was founded in June of 2019 for the purpose of promoting Canicross as a competitive sport in the United States. Canicross is meant to highlight the fundamental elements of a dog(s) and human running team: strength, confidence, speed, communication and all around athleticism. NACC events seeks to maintain and promote the highest standards for competition in canicross for dog and human running teams and canine sports enthusiasts at all different levels. NACC's standards for competition purposes are to ensure a safe activity for dogs when properly conditioned for the demands of the sport.
