

## Ask Your Candidate

As Manitobans prepare to go to the polls on October 3, CAC Manitoba encourages you to help keep consumer issues on the political agenda. As a Manitoban, you have both the right and the responsibility to determine where the candidates stand on issues that affect consumers in the marketplace. The combined voice of consumers taking part in the election process will impact the future prominence of consumer issues in the province.

## Election Issues

An effective and sustainable marketplace promotes justice and fairness for all consumers and respects their rights to be heard and informed. Social and income inequalities, misleading information, or even an unhealthy environment, are some of the barriers to full marketplace participation and a strong consumer voice in our province.

Here are a few consumer issues to keep in mind this election.

- housing access and affordability
- preventative and supportive healthcare
- income supports
- food security
- seniors' health and wellness
- environmental sustainability

On Tuesday, October 3, cast a ballot. Your vote counts and your voice matters!
