

SPINNAKER

Health Care Solutions

ABOUT US

Accomplished business professionals with an excellent track record of building and maintaining strong working relations with healthcare professionals. Our team has proven throughout their careers the ability to:

- Identify client issues
- Address client problems
- Develop solutions
- Ensure continued client success

Our team's many years of work experience include employment at Fortune 500 medical device companies, and large healthcare systems. Spinnaker Health Care Solutions was founded by Dale Strong. Dale graduated from Clemson University with a Bachelor of Science Degree in Bioengineering, and has spent his career in the health care industry with a focus on neuroscience and stroke.

MISSION

To improve patient care by providing healthcare professionals with innovative approaches and processes to better fulfill their goals through a variety of high quality and cost-efficient data services.

OUR PHILOSOPHY

In the 21st century, all industries are continually increasing their focus towards making data driven decisions. As healthcare moves towards a value based care model the need for robust data services is increasing. Each health system has different needs, and our team is here to find the best data solutions to address a wide variety of needs and budgets.

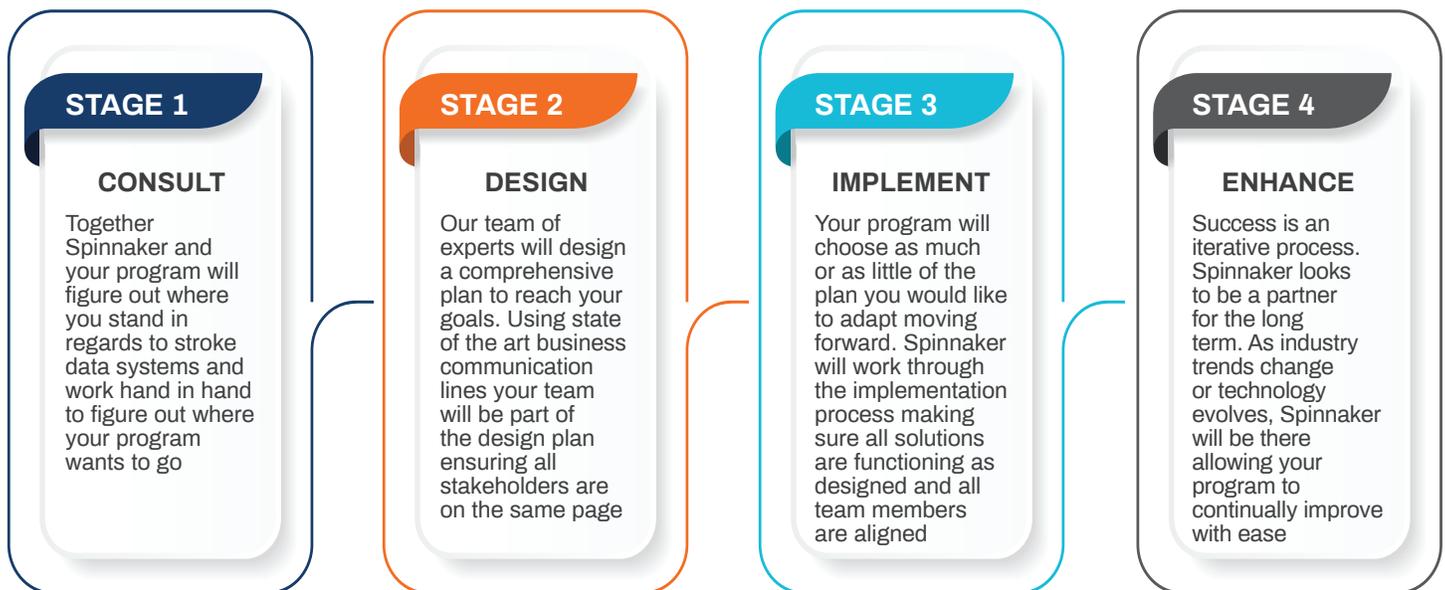

OUR GOAL

Spinnaker's goal is simple and straightforward: to make our clients successful by utilizing our services, allowing them to provide the best patient care possible and become a leader in the area of stroke program data systems. Spinnaker's value proposition is to be your program's partner in all aspects of data collection, management, analysis, and utilization, freeing your program leadership to focus on patient care.

OUR APPROACH

The success of a stroke program depends on its ability to have strong clinical care, administrative support, and a robust data program. To do this cost effectively most of the time clinical leaders are tasked with managing the data program. Spinnaker aims to service all your programs data needs in a cost efficient way that allows your program leaders to focus on overall program management.

OUR METHODOLOGY

OUR CAPABILITIES

-  Analytics
-  Designing And Running Data Reports
-  Standard Operational Procedure (SOP) Development
-  Process Improvement
-  Taking On Data Collection Workload

OUR BENEFITS

- Comprehensive customer data program design, implementation, and support services
- Avoid overhead costs of servicing a data program in-house
- Reliable service 365 days a year
- Mitigate risk, work quality, and cost associated with employee turnover
- Flexible service agreements to accommodate your ever changing program needs
- Get a team dedicated to your program that is knowledgeable of industry trends, and constantly looking to help improve your program

OUR TEAM

Spinnaker's team is made up of experienced professionals with extensive background in stroke program data. Each team member is knowledgeable of our core capabilities and will work hand in hand to identify the best services and solutions for your program. Our work in the past has fallen into some of the categories listed below:

Data Dashboards	Plan, Do, Study, Act (PDSAs)
Metric Fallout Trackers	Provider Note Templating
Case Sheets	Statistical Analysis
Transfer Site Feedback Reports	Database History Files
Control Charts	Project Planning Methodology
Data Dictionaries	Data Control Plans
Failure Mode Effect Analysis (FMEA)	Lean Problem Solving Approach (A3s)

Our experts know every program is different, and can identify a range of solutions for your program that address different needs and budgets.

OUR MARKETS

Our team is well suited to help any stroke program from Acute Stroke Ready Hospitals all the way up to Comprehensive Stroke Centers. Knowledgeable in TJC and DNV certification requirements, we will provide clients with solutions that address program needs and help comply with advanced stroke program certification. We also have experience with multiple different Electronic Medical Record platforms allowing Spinnaker to provide service to any stroke program with data needs.
