To: DOJ FRAUD INVESTIGATIONS UNIT

The links provided here offer URGENT matters that must matter to someone within your office. I have spent thousands of hours in research and have been attacked and retaliated against by local law enforcement and public servants not investigating the crimes brought forth. As a registered whistleblower it has been 5 years of waiting for the administration to hear and act to protect myself, estate and those like me as victims of these crimes against humanity. It is my prayer that our America can heal from these crimes against the homeownership and identities of Americans who have done nothing but seek to live free of trespass and pirating of our lives.

The District Attorney of Orange County, County Counsel, OC Sheriff Hutchens, Kamala Harris and others in the cast of characters have been involved in the covering up, thefts and alliances to allow for the crimes against the people, homeowners and land owners. This information must be taken seriously as it is a serious time to stop the human trafficking on paper allowing for all these unclean hands to steal that which has unfiltered protection under the law. Actions against Americans under the color of law and fraud upon the courts must end, please protect us and help hold the liable parties accountable.

Our President has been clear that no American would go unheard again and it is time we know homeowners and victims of illegal foreclosures are heard. As God is my witness, I must be heard, all homeowners who are victims of these crimes must be heard. We love our country and pray for your help in healing our lands and lives.

Read these links below, protect me from further attacks/retaliation and let's work together and end the crimes against humanity, our communities and lives of homeowners.

Thank you for your time and service to America,

c/o Whistle Blower on behalf of the US Inc and Protector of the Treasury,

\*billie
