R-2603

Flow Analyzer for water flow measuring across Chiller and AHU application based on DP type flow measuring principle with inline water flow sensing by real-time line pressure monitoring.

- ➔ Very advantageous for installation in the pipe line at G $\frac{1}{4}$ A connection and no need of flanges or pipe cutting requirement.
- ➔ No Need of separate DP Switch for water flow status contact monitoring.
- ➔ Complete inline water sensing without requirement of 5D/3D distance criteria
- ➔ Superior in flow measurement at 0.5% of reading.
- ➔ Single Model to fit all pipe sizes and capacity of Chiller / AHU
