

# WHY BLITZ

At Blitz we know. We know cars, vans, trucks and trailers. We know the inside, the outside and everything in-between. Yes, we have it all, but before anything we know.

At Blitz we listen. Years of experience taught us that you are the customer and you know what you need to create your dream car. We will guide you and we will assist you, but, before anything we listen.

At Blitz we customize. We have the little things, the big things and everything in-between to make your car exactly the way you want it. Yes, we know and we listen but after everything we customize.

**And we get it done.**

**YOU SAY IT, WE DO IT.**

## REMOTE STARTER

A remote starter can be installed in a vehicle to preheat or cool a car before the owner gets to it. Once activated, by the push of a button, it starts the vehicle automatically for a predetermined amount of time.

## DASH CAMERA

A dash Camera is an onboard camera the continuously records the view through a vehicle's windshield, it will provide evidence in the event of an accident, a ticket or even vandalism while the vehicle is parked.

## BACKUP CAMERA

A backup camera is a special type of video camera attached to the rear of a vehicle to aid in backing up and to alleviate the rear blind spot. It is there to help avoid a backup collision.

## TINTED WINDOWS

Tinted windows are for security and sophistication. Windows can be tinted in order not to overheat a vehicle and to keep the possessions safe.

## ANTI-THEFT SYSTEM

An anti-theft system is installed to secure your vehicle and your possessions in it. Buy the anti-theft system and buy peace of mind.

## TRACKING DEVICE

A tracking device is used to control a fleet of vehicles on the road. It sends messages and locates the vehicles on an electronic map.

## LED LIGHTING

LED lighting can be installed instead of the regular lighting in the car and in the headlights. Furthermore, an added strip in the trunk will make it easier to locate items in the trunk when it's dark outside.

## LIGHTS SIRENS

Lights and sirens can be installed on an emergency personal's private vehicle. It will convey to the other drivers on the road the urgency of his journey.

## COMMERCIAL SHELVING

Shelving Can be installed in larger vehicles in the place of seats. Typically used by mechanics to transport their belongings, it keeps them organized and ready to use.

## ROOFRACKS

Roof racks is a set of bars secured to the roof of a vehicle. It adds space and is used to carry bulky items such as bicycles and luggage. The racks can be adjusted according to the space needed and to keep the items secure.
