

### **Steering Committee Communication**

For the past year, the Boards of Directors of The Arc of High Point and The Arc of Greensboro have been exploring the possibility of merging the two organizations. Our Steering Committee has talked to stakeholders and analyzed service and financial data to determine if a merger would benefit their respective memberships. While both organizations have similar goals and at times have clients in common, it has been determined that a merger is not our best course of action at this time.

Both Boards have benefited from the experience of learning about each other's organization in greater depth. We look forward to continued collaboration with one another for the benefit of our shared constituents and the broader community.
