WE ARE FLOWING

Chemflo has started looking for new opportunities to grow.

CHEMFLO

“We look forward to earning a position as a full-service partner for your transloading, storage, & transportation needs”

Location, Location

Chemflo is located on KCI Trucking’s property in Mulberry, FL. KCI Trucking had an unutilized rail asset, we decided to reach out to our customers to determine if bring their products on rail was a viable option. The response was over whelming, being that railcars can hold more than tractor trailers it would cut down on their shipping cost. With the response being what it was we started to rehab the rail sites, and upon completion in 2019 we allowed our preexisting customers to bring products in on rail. Starting in 2020 we decided to open the rail site to other producers.

With our trucking company being on the same site many customers choose to enjoy the convenience of having their goods shipped via our trucking company. We offer a discount rate for companies who do utilize our trucking company. Our goal is to become your one stop shop for all your shipping

“Location, Location, Location.”

WE ARE GROWING!

We started out with four railcar spots, and a plan. We planned on having five additional rail spots by the end of 2020. We excited to announce that we have opened an additional ten spots to our rail site. We have also added to our capabilities by adding a number diaphragm air pumps. These pumps will allow us to pump off products that are too unsafe to air use air.

In the near future we will finish have twenty-five spots open, as well as the ability to unload grain/feed. We are also looking into adding a tank farm to our facility. We will start on a customer to customer bases.

We have 14 rail spots available.
