	narrate what you are ap	oplying for co	st share assistance for; as well as any

- 1. Share Payment: The amount of cost share payment is based on several factors including but not limited to project type, location and overall cost the project. Payments are assistance to help implement best management practices.
- 2. MCSWCD encourages that the applicant acquire at least three (3) estimates for the proposed project.
- 3. The MCSWCD requires the applicant to meet "T" (tolerable soil loss) in the field where the practice is installed. For most fields, this will mean using, at least, a conservation tillage system or chisel disk system.
- 4. Land user agrees to allow free access to the property where the land adjustment, soil conservation project or cropping management project is to be constructed, installed, or implemented for the purpose of planning and ranking the project. Neither the District or its representatives, nor the landowner or operator will be liable for any damage to the other's property in carrying out the provisions of this agreement, unless such damage is caused by negligence or misconduct.
- 5. Cost share dollars will not be used for partial payments for components or any other appurtenances of projects unless conservation practice is completed and meets NRCS Standards.
