HAVE YOU BEEN FIT TESTED FOR YOUR N95 RESPIRATOR?

Keltech provides qualitative fit-testing for basic N95 or equivalent masks, half-face, and full-face respirators. To fight the spread of COVID-19, we follow strict equipment disinfection protocols and **we provide each person with a new, single-use hood** as part of the fit testing service. Our fit testing is carried out by certified technicians, in accordance with CSA and WorkSafeBC Standards.

We are fully mobile with qualified technicians available to come to your workplace. We can also provide fit testing at our Kelowna location. To book your fit testing, please contact us at 236-420-1193 or email allan@keltechenviro.com.
