

SPAYING & NEUTERING

Benefits FOR HAPPY PETS AND FAMILIES

PETS WILL LIVE LONGER

A world without cat and dog neglect, abuse, and abandonment is within our reach!

There are many potential **health benefits** for your pet from spaying & neutering. Spaying can help prevent breast tumors, ovarian cancer, and uterine infections. Neutering can help **prevent** testicular cancer and prostate problems. Your pet will likely **feel better, be happier, and live longer**.

MORE POSITIVE BEHAVIORS

Please don't litter.
Spay or neuter
your pet today.

A spayed female will no longer go into heat. They won't yowl or urinate to find a mate. Your neutered male will have less reasons to roam, **keeping him safer** from car accidents and animal fights. Also, neutered dogs and cats will less likely release foul smelling urine to mark their territory. Dogs will mount less, and aggression may be avoided when neutered at a young age. Spayed and neutered pets will be **more affectionate** towards **YOU** because they are not trying to find a mate.

YOU WILL SAVE MONEY IN THE LONG RUN

Actually, most spay and neuter surgeries are **affordable** and low-cost clinics may be offered in your area. Plus, animal litters are very expensive! **And the potential costs of future diseases when NOT choosing to spay or neuter can be costly.**

Deciding to spay or neuter your pet will be one of the most important decisions you make as a pet owner.
