

HEAT PUMP & AIR HANDLER

BEST

QuietComfort® Deluxe 18 Heat Pump + FCM4X Air Handler

- ▶ Up to 18 SEER, 13 EER, 11 HSPF efficiency
- ▶ As low as 56 decibels
- ▶ 5-stage Inverter compressor
- ▶ Variable-speed fan blower
- ▶ Compressor blanket for noise reduction
- ▶ Durably built with tight wire grille and protective corner posts to withstand bad weather and debris
- ▶ Includes Ion™ Communicating System Control
- ▶ Energy Star rated
- ▶ 10-Year No Hassle Replacement Warranty on heat pump and air handler
- ▶ 10-Year Parts Limited Warranty

BETTER

QuietComfort® 16 Heat Pump + FXM4X Air Handler

- ▶ Up to 16 SEER, 13 EER, 9 HSPF efficiency
- ▶ As low as 68 decibels
- ▶ Single-stage compressor
- ▶ Multi-speed fan blower
- ▶ Compressor blanket for noise reduction
- ▶ Durably built with tight wire grille and protective corner posts to withstand bad weather and debris
- ▶ 5-Year No Hassle Replacement Warranty on heat pump
- ▶ 1-Year No Hassle Replacement Warranty on air handler
- ▶ 10-Year Parts Limited Warranty

GOOD

Performance 14 Heat Pump + FEM4X Air Handler

- ▶ Up to 14 SEER, 11.5 EER, 8.2 HSPF efficiency
- ▶ As low as 69 decibels
- ▶ Single-stage compressor
- ▶ Single-speed fan blower
- ▶ 10-Year Parts Limited Warranty

What is AFUE?

AFUE stands for Annual Fuel Utilization Efficiency. Furnaces range in efficiencies from 80-98% AFUE. The higher the efficiency, the less gas you use and the more you save.

What is HSPF?

HSPF stands for Heating Season Performance Factor. The higher the HSPF, the better the unit performs in cooler temperatures.
