NG	Networth Gain	by now people should see their is a grid that is around the atmosphere
	<p>For grid accuracy the lo, ng, no, se needs placed (I did the ng) but the others are listed in other names and I'm not looking for grid accuracy any longer seeing as all the work I've produced has been destroyed and now I just want to show others that these line items do match up. This is a really good piece of cryptography and if you read each name you can see how it has all the components of the military industrial complex and the government. That is on purpose. That is by design. There is another one of these books thats named the same name that is mentioned in this book and it had names that I broke down too that matched up to the world trade centers and then the war in Iraq. This means they wrote the first book to carry out the first attack</p>
