MESSAGE FROM THE PRESIDENT

BEING NEGATIVE IS THE NEW

POSITIVE! People like to celebrate the positives, right? Well, this is 2020 and sometimes being negative is the new positive. I am referring to Covid, what else? As densely populated and as big as Pinellas County is, the positivity rate in our county is at 3.5%. The goal is to be under 5%.

As the State progresses through the stages of opening, a lot of people watch and hope the positivity rate does not climb. This rate affects all our businesses.

We are still under restrictions.

Bars were allowed to open this week with restrictions. Some people feel they are prisoners by this pandemic. This is not a necessity. These phases can continue to be progressive provided we continue to practice social distancing and wear masks or face coverings.

What can we do as local businesses? We can support each other and our local businesses. This is a necessity to keep each other going!! No one can do it alone but together we can support each other! And remember...

You don't build a business. You build people, and people build the business." -Zig Ziglar

Feel free to contact us at so49web@aol.com or jsrtraining@aol.com or call 727-439-0164!

Respectfully,
Jeri Reed, RN
President

CENSUS 2020

by Robert Longley

Please make sure you fill out your Census form; the data is important to all of us. The census is used to apportion members of the U.S. House of Representatives and for allocating funds for programs to help the needy, elderly, veterans, and more. The statistics also might be used by local governments to decide where infrastructure projects are needed. Many people consider the questions from the U.S. Census Bureau either too time-consuming or too invasive and fail to respond. But responding to all census questionnaires is required by federal law. While it rarely happens, the Census Bureau can impose fines for failing to answer the census or the American Community Survey or for intentionally providing false information.

SAFETY CORNER

by Officer Zack Mills

HOW DOGS ARE GREAT FOR HOME DEFENSE

A dog can be a good alternative or a supplement to an alarm system. With their acute senses of hearing and smell, dogs become aware of intruders long before humans do and will bark an alert. Criminals prefer homes without dogs to bark an alert. Most authorities on the subject of home security agree that a barking dog is a good deterrent.

However, opinions differ on the issue of the size of the dog. When using a dog solely as an alarm system, the dog's size is really a matter of individual choice. Some experts contend that dogs should only be considered an early warning system, not an actual defense tool. Using this line of reasoning, a small dog is as valuable as a large one.

A large dog will be your only option if you get into the guard dog or personal protection dog category. True guard or attack dogs require extensive training by a professional trainer and knowledgeable handling by the owner.

Peace is not the absence of conflict, but the ability to cope with conflict by peaceful means.

-Ronald Reagan

Owning a guard or attack dog could possibly cause your insurance company to raise your homeowner's liability rates or even cancel your policy and may expose you to civil liability. If considering the purchase of this type of dog, remember that there are no uniform credentials for dog trainers in this field. You may want to consult your veterinarian and lawyer for advice.

Remember that a dog is a living creature that requires regular care. Before you decide to buy a dog, consider the changes such an addition to your household will make and evaluate your willingness to dedicate part of your life to the animal, just as it will dedicate its life to you.

Even if you don't have a dog, putting a dog bowl and/or leash outside can create the illusion of having a dog. You can purchase motion sensors door bells that feature a barking dog recording or display beware of dog signs.
