HART Intelligent Field Communicator

HART 7 Version

■ DESCRIPTION

HART® Intelligent Field Communicator can configure, check and maintenance all devices matched with HART® protocol.

Intelligent Field Communicator can support all instruments with HART® protocol, performing functions like range setup, loop test, process variable monitoring and field calibration.
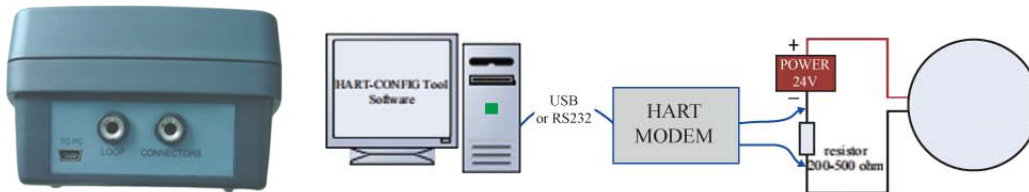

Intelligent Field Communicator support not only the first primary device with HART® protocol (HART® net bridge and so on), but point to point and multi-point HART® protocol communication mode.

USB HART MODEM232

■ APPLICATION

The adapter is used for communication between the HART transmitter and PC-based software such as HART-Config Tool.
