

## Flexibility Audio

Mesa has invested over 31,000 hours in research and development to redefine and bring light to the engagement industry. We have developed a software and video system that utilizes the connect sensor, allowing hands-free gesture controlled engagement, a combination that has brought innovation and excitement to the engagement industry.

This gesture driven interaction provides valuable data feedback. The creative use of Mesa system provides many industries with access to exclusive innovative technology that engages people, generates new clientele and increases revenue and loyalty. MESA has proven gesture, controlled interaction, increases engagement, and enhances memory and generates curiosity, inviting others to connect and engage.

By utilization of our system, which combines interaction and location statistics, industries obtained a greater understanding of people and their habits. With only a click of a button, interaction data can be analyzed anywhere. Anytime.
