

GETTING TO AND BEYOND THE PSS 150 THRESHOLD

A PSS of 150 = Institutional Sustainability and growth

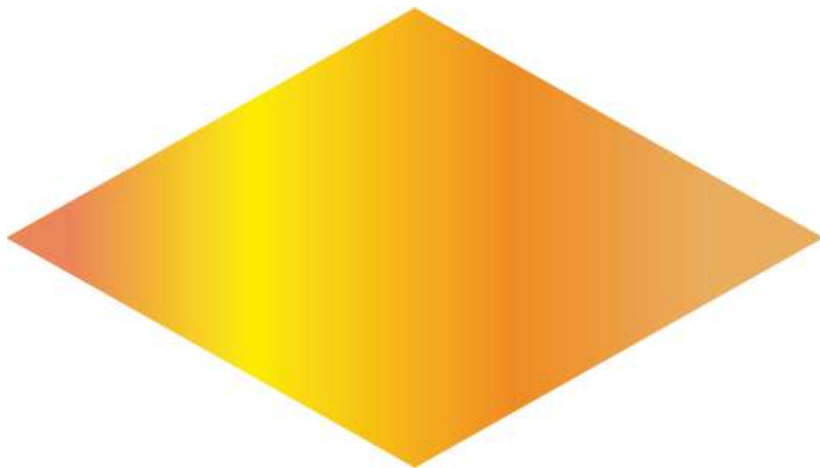

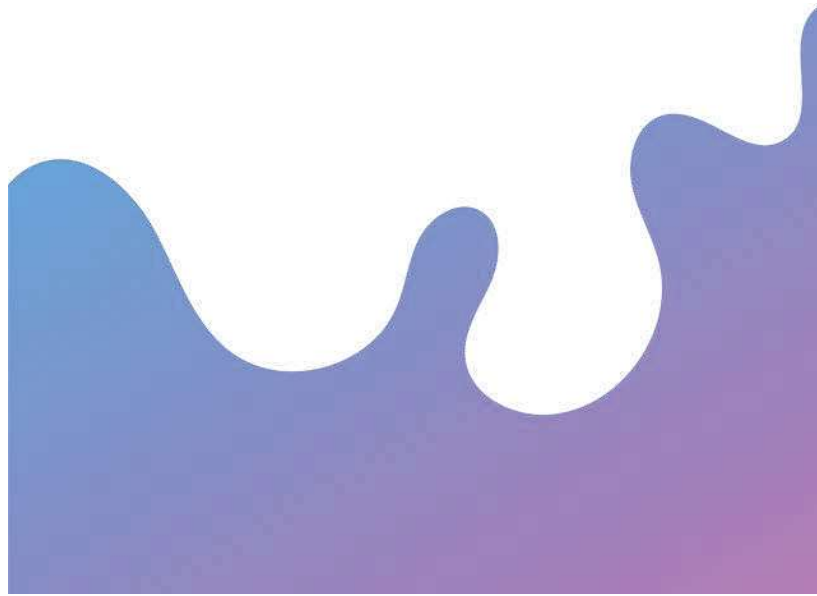

4-Year graduation 70%

FTFT Fall-to-Fall retention 80%

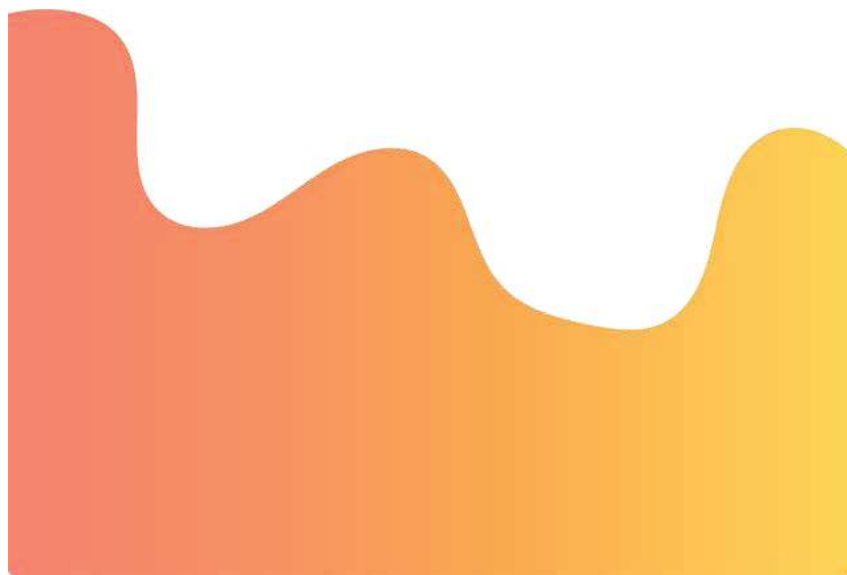

Since 2007, we have used the National Center for Education Statistics data to develop outcome prediction models for colleges and universities. One of the strongest predictors is a combination of aggregated fall-to-fall retention and six-year graduation rates.

We call this composite a Persistence Success Score. Combined with other Key Performance Indicators, we have found that a minimum score of 150 establishes a foundation (statistical and pragmatic significance) for institutional planning and growth.

Modern Assessment Systems are part of the Mainstream Institutional Culture and involve every stakeholder concurrently in developing a sustained culture of authentic evidence and tangible success.

Six steps

Getting to and beyond the PSS 150 Threshold

Getting to and beyond the PSS 150 Threshold

1. Conduct a Deep Data Audit of programs, student support units, and administrative functions.
2. Infuse technology-driven Inquiry-Based Learning and High Impact Practices across the curriculum.

Getting to and beyond the PSS 150 Threshold

3. Infuse technology-driven student engagement practices across the entire institutional ecosystem.
4. Utilize 24/7/365 passive and limited 360-degree active assessment.

***We would love to collaborate
with your institution in 2023!***

***Every data point is in the ONE!
Everything is IN the ONE!***

Getting to and beyond the PSS 150 Threshold

5. Be nimble and adjust (like a thermostat) to maintain a conducive institutional-student interface.

6. Evaluate academic programs, student support units, and administrative offices as ONE entity from a temporal and situational perspective.

Getting to and beyond the PSS 150 Threshold

The solution is an integrated evaluation system forming the foundation of an institutional information ecosystem. This dynamic ecosystem views ALL departments, offices, and auxiliaries as One interconnected System whose outcomes are explicable only by reference to the whole institution.
