

EXOGENIX

TOPICALS

A woman with long brown hair, wearing a white tank top, smiling and touching her face with her hand. The word 'TOPICALS' is overlaid in large white letters.

POST-CARE EXOSOME PRODUCTS

Our Topical Exosome products harness the unmatched potential of patented MSC exosome technology. The patented technology allows you to store the topical gel for up to 18 months at room temperature. By leveraging these extraordinary properties, our Topical Gel offers a cutting-edge solution for promoting cellular regeneration and rejuvenation for various applications.

ANTI-INFLAMMATORY EFFECTS:

The powerful cytokines and growth factors present in our topical exosome products have anti-inflammatory properties, can help to alleviate skin irritation, redness, and inflammation caused by various conditions.

SKIN REJUVENATION:

Our topical products can help promote skin rejuvenation by stimulating collagen production, reducing the appearance of fine lines, wrinkles, and improving overall skin texture.

SUN DAMAGE REPAIR:

The regenerative properties of our topical exosome treatments can aid in repairing sun-damaged skin, reducing sunspots, and improving the skin's resilience to harmful UV radiation.

PAIN RELIEF:

Our patented technology of stabilized exosomes in our topicals may provide localized pain relief for conditions such as arthritis, joint inflammation, or muscle strains.

DERMATOLOGICAL CONDITIONS:

Our topicals show potential in managing various dermatological conditions, including eczema, psoriasis, and rosacea, by supporting the skin's natural healing processes and reducing inflammation.

SCAR REDUCTION:

Regular use of our topicals on scars may help diminish their appearance by promoting the regeneration of healthy skin cells and improving overall skin tone and texture.

WOUND HEALING:

The regenerative properties of Exosomes in our topicals can aid in accelerating wound healing processes, promoting tissue repair, and minimizing scarring.
