

TUG BOATS

We offer a range of tugboats, including shallow pusher tugs and canal class tugs, tailored to the specific requirements of the watercourse.

Tugboats are primarily utilised to push large hoppers along the watercourse.

Shallow pusher tugs are ideal for navigating shallow waterways like canals, while canal class tugs, with their deeper draft and increased power, are better suited for more demanding conditions.

SHALLOW TUGS

- 14 FT
- USE WITHIN SHALLOW WATERWAYS

CANAL CLASS TUGS

- 20 FT
- ADDITIONAL POWER
