T-Bone or Ribeye

Roasted Potatoes | Vegetable

Here at Zack's we do things differently, very differently. Most restaurants don't serve fresh food. What does fresh mean? Fresh means not from a bag, no "powdered" sauces, nothing from frozen; it means 100+ hours of prep work each and every week to serve you a plate of fresh locally sourced food. We have the sharp knives and scars on our hands to prove it! When you order some of our famous chicken tenders you can sit there and enjoy them knowing that they were never frozen, they were marinated in buttermilk and hand floured right after you ordered them. They're even cooked in oil that's free of nasty additives like TBHQ and Dimethyl Polysiloxane, both used as anti-foaming agents, whatever that means! We even have a dedicated gluten free fryer.

At Zack's Farmacy, we believe that food is medicine. We have all gone through a tremendous personal health journey. Whole and locally sourced foods are the key to a healthy diet. Nature provides all that is needed for you to be strong and healthy. That is exactly why so much time and effort is put into bringing you the best locally sourced and freshest of ingredients. It takes two days to shop for this restaurant. There are eight farms and local businesses that we support and shop at every week, and even more on a less frequent basis. From meats to vegetables and fresh cut fungi, we've got it all! When you dine with us you are helping to bolster the local economy of Clarion County and supporting dozens of hard-working farmers and local families.

The kitchen has over sixty years of combined culinary experience. We have taught and trained everyone on staff how to prepare your food in accordance to our high standards. Everything in our kitchen is cooked fresh upon order. We don't have microwaves! It may take a few moments more than you're used to, but we know it's worth the time! We want you to enjoy this special time at the dinner table with your family and friends just as we did as children. Zack's is all about bringing the family together, and what a better way to do it than with fresh local food!

Let's play a game! How many times can you find the word local on this menu?

***Consume raw or undercooked foods at your own risk of foodborne illness.**

The Network

Every week we sell fresh food. Every week we must buy more fresh food.
