Force-Tech Calibration System is an NABL accredited calibration laboratory as well as manufacturer of civil testing equipments. We have complete range of cement testing/Concrete/Soil/Bitumen and Asphalt testing equipments. Our testing lab equipments has been designed in consonance with the precise requirements of the professionals who need to ensure the material attributes. All the equipments is developed as per the global standards and with the highest accuracy so as to ensure that every reading is perfectly captured and the analyses are well done. Following are the measure equipments list.

- Cement Testing
- Concrete Testing
- Soil Testing
- Bitumen and Asphalt Testing

Cement Testing Equipments

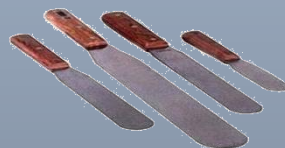

Vicate Kneedle Apparatus

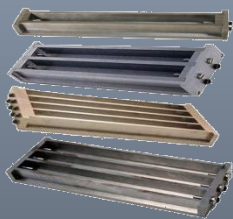

Vibrating Machine

Tensile Strength Tester

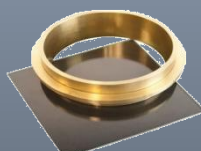

Standard Spatula

Shrinkage Bar Mould

Sand Content Kit

Ring Mould

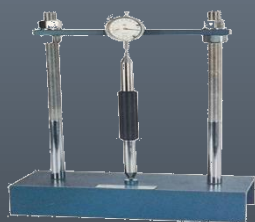

Prism Mould Three Gang

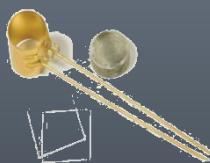

Mud Balance

Marsh Funnel with Measuring Cup

Length Comparator

Le-Chatlier Mould

Le-Chatlier Flask

Autoclave

Heat Hydration Apparatus

Flow Table

Briquette Mould

Blaine Air Permeability

Volume Change Apparatus

Concrete Testing Equipments

V-Funnel

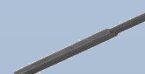

Vee Bee Consistometer

U-Shape Box Apparatus

Tamping Rod

Tamping Bar

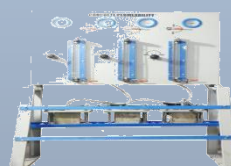

Straight Edge

Slump Cone

Pocket Concrete Penetrometer

Permeability Apparatus

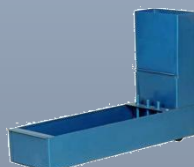

Mortar Penetrometer

Melting Pot

Longitudinal Compressometer

L-Shape Box Apparatus

Lateral Extensometer

Concrete Pan Mixer

Kelley Ball Pen. App.

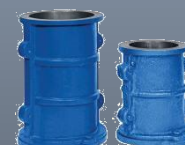

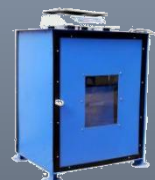

Flexural Testing M/c.

DLC Vib. Hammer

Compression Testing Machine

Curing Tank

Cube Mould

Analogue Compression testing Machine

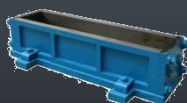

Digital Compression Testing Machine

Analogue Manual CTM

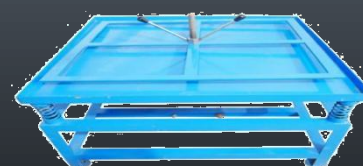

Compaction Factor App.

Beam Mould

Air Entrainment Meter

Vibrating Table
