CLAN LAB RESPONSE TRAINING

Methamphetamine, Fentanyl, Heroin, and Indoor Marijuana Grows
Lafayette, Louisiana- September 26-30, 2022

This course provides in-depth understanding for investigations and clandestine lab processing. Law Enforcement and Fire Response Personnel are encouraged to attend!

In this course students, will follow a curriculum compliant to the OSHA HAZWOPER program including medical monitoring, personal protection equipment choice, air-monitoring, and many other safety protocols. Then the core program begins with identifying the illicit drug operation taking place at a site.

Once the student has mastered the identification of these operations, they are trained to identify the equipment necessary to process the site safely and provide DECON of personnel to reduce the risk of cross contamination and or death. At this point the practical training begins allowing the student to utilize the equipment taught in lecture.

Students will participate in identifying mock clandestine operations including methamphetamine, fentanyl, heroin and marijuana grows and finally begin the process of collecting evidence and field testing. Quick, essential, and pertinent testing procedures will be mastered by the student while donning protective equipment.

The final test involves an actual clandestine lab response. Each student is trained to process the materials in these operations and supervise the operation if necessary. Officers will be trained to recognize the signs of exposure and take the necessary steps to safeguard their personnel. All students will be field ready at the end of the training.

Students will leave these courses with a near expert understanding of the items used, dangers specific to these clan labs and a new sense of safety! The 40-hr course curriculum includes:

- Response Plan and Techniques**
- Identify Illicit Drug Lab Operation**
- Investigations and Evidence Collection**
- Chemical Handling and Drug Testing**
- PPE and Necessary DECON Techniques**
- Emergency Scenarios and Action Protocols**
