GRANITE MOUNTAIN BREEDING SERVICES

Hello there!

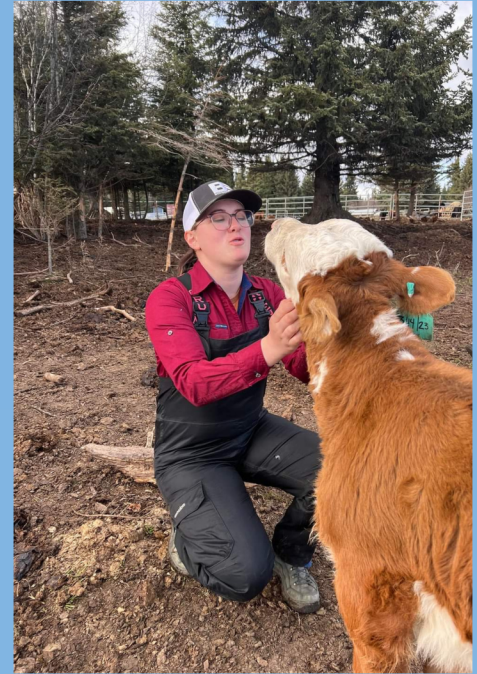

Welcome, and thank you for choosing Granite Mountain Breeding Services for your cattle's artificial insemination program! I am so looking forward to working with you to formulate a plan that will give you a better chance of success. Artificial insemination offers Alaskan producers a special opportunity to bring new genetics into their herd without dealing with the cost of a live bull. It also allows rapid improvement of your herd's genetics, which can only be a good thing!

If you're brand new to AI, I hope this guide will answer your questions on the process. As always, feel free to hit me up with any questions you have via email, my website, or call 907-987-7420.

Hailey
Owner, GMBS

About me

I'm Hailey Edwards, the owner and technician of GMBS. I was born and raised in Delta Junction, Alaska to a farming family. I've raised beef cattle for over ten years and in 2021, I began considering learning how to ai cattle. We were getting into selling beef, which necessitated bringing in new genetics. In 2022, I received my certification in artificial insemination from Bovine Elite LLC in College Station, Texas.

Shortly after, a family friend offered the opportunity for me to work on her cattle, resulting in four successful ai calves. Since then, I've ai'd nearly 50 cows and am set to ai more in 2024.

Why Work with Me

I understand the investment it takes to add new genetics to your herd. I am passionate about genetics and will work to ensure that you get the product you want to the best of my ability. That being said, the cow comes first. If a cow has trouble settling down, I'll take my time during the process. Slow is fast in this process and yields better results. A calm cow is a cow that will take to ai better. You can feel confident knowing your cows are in patient hands.

Rome wasn't built in a day, nor is a successful ai program. Generally speaking, it takes at least five years to develop a successful ai program. But! That doesn't mean you can't have success during year one. I will work with you to formulate a program that works best for you and your cattle. It doesn't matter if this is your first year raising cows or if you've been calving longer than I've been alive, I can't wait to work with you!

How It Works

- 01 BOOK A CONSULTATION CALL**

On my website you can schedule a phone call or a zoom meeting. This is free and will last up to 1hr 30 minutes. Prior to the call I will email over a questionnaire for us to go over during the call.
- 02 HOMEWORK**

Depending on your goals, I'll take this step to figure out when we can breed your cows, decide on an estrus synchronization, program and look at potential bulls.
- 03 DEPOSIT IS PAID**

If you've decided to continue with ai, I require a non refundable \$150 deposit that will be credited to your final bill.
- 04 SCHEDULING**

I will get in touch with other clients to coordinate breeding days and semen shipping dates.
- 05 ORDER SEMEN**

Once a bull or several have been chosen, I will coordinate with you and other clients so that shipping costs can be spread out.
- 06 CONFIRM BREEDING DATES**

This is where we confirm that I am coming and when I am coming.
- 07 ESTRUS SYNCH AND AI BEGINS!**

We complete estrus synch and the ai program!

@granitembs

A word about the pricing

TRAVEL COSTS WILL BE SPREAD AMONGST SEVERAL PEOPLE.

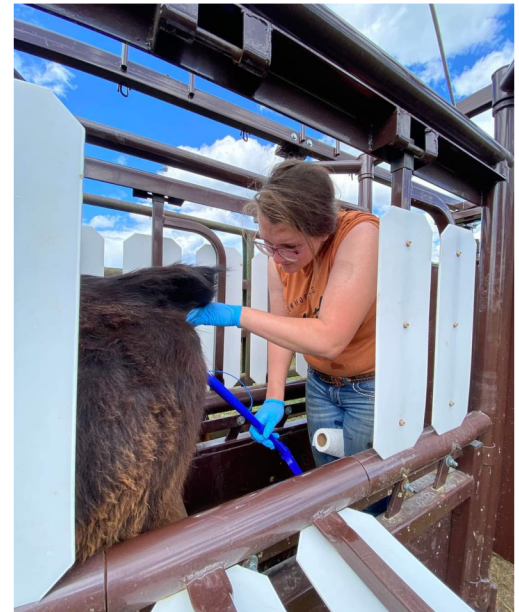

The idea is to gather several people within the same area so as to cover my travel costs and still give each and every client the best experience possible.

AI AND ESTRUS SYNCH COSTS ARE INDIVIDUALIZED.

As you'll see later in the guide, these prices are individual and will not be spread out amongst several people. You have the option to include estrus synchronization or you may choose to work with your vet, another producer or carry out the process yourself.

SEMEN STORAGE

I have a semen tank that will store up to 500 straws. You may choose to store your straws in my tank or if you have your own then you may ship the straws to your place. Straws need to be ordered as early as possible.
