## Premium or Standard Order

There are two options for ordering a custom wallscroll or Kakejiku. A premium custom order allows you to choose all of the options, choose your own scroll style, cloth selection(s), jikusaki and will include your scroll in a very nice kamibako. This allows the customer to have more flexibility to create a scroll that is exactly to their specifications.

The standard order provides the customer with the opportunity to select a desired color for the scroll, but not a specific cloth or scroll style. Upgrades are available if the customer so desires.

## Word Phrase & Writing Style

### Select the Phrase

Please review the size and number of characters available for the scroll selected. Put the number of words in the green section next to the corresponding writing style desired for the scroll. Exclude particles A, An & The.

*Hanshi* paper is limited to 1 or 2 large characters. This is shown through the picture of the Kaede scroll referenced on page four of the instruction booklet.

A *Yatsugiri* scroll can comfortably fit 4-5 large characters in a single vertical line or seven to eight small characters on dual vertical lines.

The *Joufuku* scroll can fit 7-8 Large characters in a single line or 14 characters in dual lines. The scroll titled "Star of the East" referenced on page four has 13 characters.

Indicate the phrase in English so that we can translate into Japanese for you.

### Select the Writing Style

There are many writing styles that are taught and used in *Shodou*. Custom Japanese Calligraphy provides primarily three different writing styles. *Kaisho* style is the most formal and is a block print style of calligraphy. The semi-cursive style, called *Gyousho* allows more artistic freedom in both the combination of some stroke orders and the way the character is written.

The *Sousho* style is the most artistic and is a full cursive style with which the calligrapher can take the most artistic liberty. The drawback to this style is that without training it is almost impossible to read, even by Native Japanese.

## Scroll Design (Cloth)

Custom Japanese Calligraphy provides high quality materials for the creation of the custom scrolls. For customers who select the **Premium** scroll design option, online files will be sent to select the cloth. Cloths sent in those files will either be a silk or pure silk cloth. For customers utilizing the **Standard** scroll design option, state to me a desired color, and CJC will select the cloth to be used. In most cases this will be a partial silk called Benberugu.

## Scroll Design (Pattern)

Many different scroll styles are available to select for a **Premium** scroll package. If the **Standard** scroll package is selected then CJC will select the *Maru Hyougu* scroll style. If the customer of a standard package would like a different scroll style, then it is recommended to upgrade to the **Premium** package. Scroll styles can be seen at CJC's blog [www.wallscroll.blogspot.com](http://www.wallscroll.blogspot.com) A brief description of each will be provided below.
