OWN NITROGEN**

**NITRO-DRAUGHT**

# WITH NITRO-DRAUGHT™ BASIC...

## You Will Have All The Nitrogen That You Need For Any Food Or Beverage Application

Whether you are using nitrogen for a blender, dispensing wine, nitrogenating, powering pumps or any other application, we have a Nitro-Draught Basic capable of supplying an on demand supply of brewery grade™ nitrogen!

**Convenience:** No more changing or running out. No more ordering or worrying which old fashion high pressure cylinder is full or empty. Much more effective use of space and employee training and labor.

**Safety:** Low operating pressure of Nitro-Draught versus the 2000 psig of those high pressure cylinders. Permanently mounted, so no chains are required. No more moving heavy cylinders or using wrenches!

**Quality:** Our food and beverage grade nitrogen is a minimum purity of 99.8% compared with the unknown quality of those old fashion high pressure cylinders. Endless flow maintains consistent food and beverage quality and customer satisfaction.

**Savings:** With a single, low monthly service fee, we will provide limitless nitrogen. No deposits, delivery fees, fuel surcharges, lost cylinder bills, multiple invoices to handle. With Nitro-Draught, we will improve your operation and improve your profit!

### Applications:

- Nitrogen for blenders
- Coffee dispense and nitrogenation
- Soda and Beer Pumps
- Wine preservation and dispense
- Brewery product transfer, tank inerting, nitrogenation
- And many, many more!

Nitro-Draught Basic	Kegs/hr @ 70% CO2*	Wine Bottles/hr*	cuft per month
1200	4	265	1700
Pro	6	310	3000
Max	12	576	7300

Three sizes available and custom configurations to fit any application. \*Based upon a 3 hour peak flow in 1 tank config at 50 & 20 psig
