

## COMPANY PROFILE

## GEOXPert LIMITED

# COMPANY OVERVIEW

Geoxpert Limited (**GeoXpert**) is a private registered company under the laws of the Republic of Ghana with experienced and dedicated professionals in Geological Engineering related fields.

We are consultants and contractors with expertise in

- General Geological Services
- Mineral Exploration Services
- Geotechnical Works
- Auger Drilling Services, etc.

The team has worked extensively in Ghana and abroad.

## Company Information and Contact Details

- Business Name : Geoxpert Limited
- Business Address : Box AN10011, Accra-North, Accra
- Business Location : Kwasi Oppong Street, Near Paradise Estates - Dome Pillar 2, Accra (GE-335-6878)
- Telephone : +233 50 2754779 / +233 55 3183837
- E-mail : [manager@geoxpert-limited.com](mailto:manager@geoxpert-limited.com)
- Web address : [www.geoxpert-limited.com](http://www.geoxpert-limited.com)

# WHAT WE STAND FOR

## GOALS

To be innovative in the provision of expert solutions to the needs of our clients.

All supplies and services are to be accomplished effectively, efficiently and professionally, respecting the time and resources of our clients, in a safe and healthy environment.

## CORE VALUES

Excellence, Quality, Uniqueness, Innovation and Professionalism

## VISION

To provide excellent consulting and contracting services in our designated fields to exceed the expectations of our clients.

## MISSION

GeoXpert is purposed to build long term relationships with our clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

# GEOLOGICAL CONTRACTORS

## GEOLOGICAL LOGISTICS

We have senior members who understand the technical and logistical demands of various exploration projects.

## TECHNICAL FIELD ASSISTANTS

The role that field technicians play in a project can not be overlooked. It is their handling of the “petty” things like sampling that gives life to the project. We have junior geologists and well trained and experienced field assistants.

## PROJECT MANAGERS

The diverse nature of our professionals' background and the experiences of our senior geologists from different projects, give us an edge in geological project management.

## EXPLORATION GEOLOGISTS

The exploration team are capable of managing, planning, coordinating and supervising exploration projects from grass-root to advanced projects.

# CONSULTING AND CONTRACTING SERVICES

## MINERAL EXPLORATION

GeoXpert provides field geological services in all aspect of mineral exploration. We have the team that can plan, execute and manage projects efficiently and effectively. Some of the activities we undertake include but not limited to the following:

- Managing mineral exploration projects.
- Exploring and defining mineral deposits.
- Planning, executing, and supervising of all geological activities.
- Logging and sampling of drilling, geochemical, geophysical, geotechnical and other geological activities.
- Data validation of mineral deposits.
- Quarry Evaluation

## LAND & MINE SURVEY

Our competent survey team can provide clients with detailed, road, farm, drill hole, topographical and cadastral surveys as required for various projects. We have moved abreast with modern technology by utilization of drones alongside D-GPS and other modern surveying and mapping tools for both mine sites and other projects.

## ADDITIONAL SERVICES

We also offer advisory services for all types of geological projects; Geophysics, Geotechnical, Hydro-geology, Drilling and Minerals Analytical Laboratory Services.

# LOGISTICS & MATERIALS SUPPLIES

We do sell and supply all sorts of high-quality consumables and logistics required for field exploration programs including Personal Protective Equipment (PPE) either in small or large quantities.

Notable is our supply of unbreakable glass made from Polycarbonate Sheets that is very suitable for mine and exploration site construction in place of ordinary glass.

Some of the items we deal in are core trays, chip trays, plastic and calico Sample bags, marker pens, geological hammers/Picks, hand-held compasses, GPS handsets, helmets, nose masks, etc.

## SOME ACTIVITIES EXECUTED

- 2022 – 2023:** Auger Drilling for Perseus Mining Ghana, Ayanfuri, Ghana
- 2019 – 2021:** Geological Services on Japa Project; Exploration and Resources Drilling – Tribune Resources, Wassa Akropong, Ghana.
- 2018 - 2022:** Mansala Guinea Soil Geochem – Golden Guinea Resources, Siguiri, Guinea
- Alahine Guinea; Field management, Soil Geochem & Exploration Drilling Programs – Golden Guinea Resources, Siguiri, Guinea
- 2019:** Asankrangwa Reconnaissance and Adits Sampling, Asankrangwa, Ghana
- 2017:** Mansounia Soil Geochem Program – Blox Inc., Kiniero, Guinea.
- 2016:** Kossanke Mineral Reconnaissance and Mapping – Koumban Minerals SARL, Kossanke, Guinea

# TECHNICAL MANAGEMENT TEAM

*Bernard A. Asare (mGhIG, fWAIMM)*

*Principal Geologist*

*He holds MSc. in Geological Engineering from University of Mines and Technology, Ghana, and a member of Ghana Institution of Geoscientist. He is also a member of Geological Society of America (GSA) and a fellow of West Africa Institute of Mining, Metallurgy and Petroleum (fWAIMM). He has over 25 years of geological and project management experiences in Ghana, Australia, Cote Ivoire, Burkina Faso and Guinee for various companies. He previously worked for Star Goldfields, Adansi Gold (Now Galiano), Burey Gold Sarl, Gold Fields Exploration, Ashanti Exploration and SEMAFO. He played an important role that led Obotan Mining project to move from exploration phase into the mining development phase at Nkran, Adansi. He is presently the Projects Director/Principal Geologist with GeoXpert.*

*Ebenezer Otoo*

*Operations Geologist*

*He holds a BSc. in Geological Engineering from the Kwame Nkrumah University of Science and Technology (KNUST), Ghana. He has extensive knowledge and over 15 years work experience in engineering geology and mineral exploration (West African sub-region). He has excellent organization and management skills having served in various roles and capacities for organisations such as Coffey Mining and Terrex Consulting as an Exploration Geologist. He is Operations Geologist with GeoXpert.*

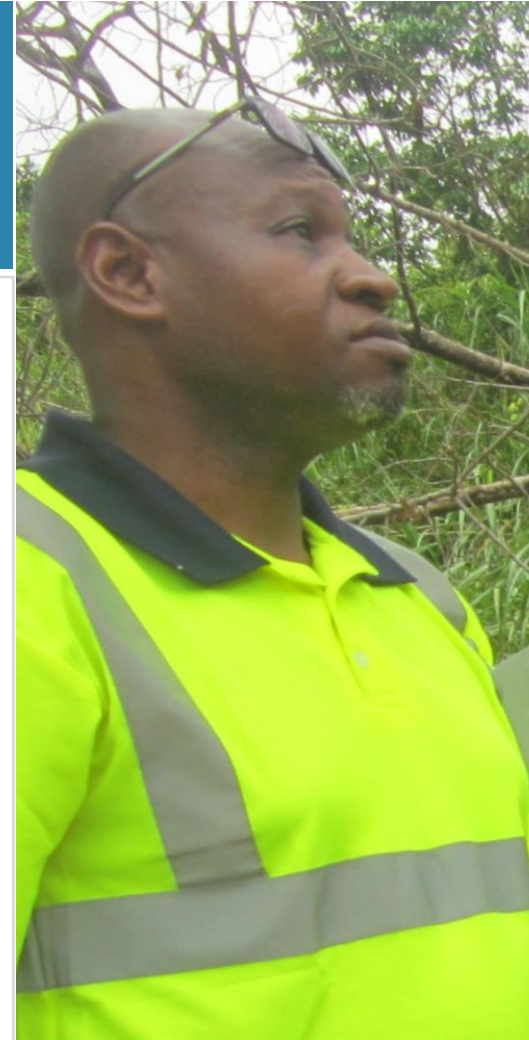

## TECHNICAL MANAGEMENT TEAM

**Zaid Tetteh Yemoh (MBA, MGHIG)**  
**Consulting Geologist**

Zaid Tetteh Yemoh graduated from the University for Development Studies with Bachelor of Science (Hons.) Earth Science and he is a professional project manager with Master's in Business Administration (MBA)-project management option from Green Hill College (GIMPA). He has been engaged in geological, geochemical and geophysical field exploration for +9 years within the major gold belts in Ghana. He is well-rounded in the supervision of exploration projects from early stage exploration to resource estimation stage. He prepares exploration budgets, plans exploration programs and coordinates exploration projects in any form. He has previously worked for AngloGold Ashanti-Iduapriem, KAMA Ltd, Star Goldfields Limited and Terrex Ltd. He is a member of the Ghana Institution of Geoscientist and a consulting Geologist with Geoxpert Limited.

**Chrysbert Mortagbe**  
**Principal Surveyor (CBM)**

He holds a degree in Surveying from KNUST School of Mines, Ghana and a probate member of the Royal Institute of Chartered Surveyors. He has +24 years of experience in managing multiple projects on various clients' sites in West Africa. He has been involved in planning and designing of infrastructure for mines. He worked for Gold Fields (Damang mine), Leoshield and Mutual Resources, Ghana as their site surveyor. He recently worked on a pre-feasibility study stage – Preliminary investigation of three proposed Dam sites on Ankobra River, western Ghana. He executes close topographic grid surveys, procures for satellite digital elevation model for estimated areas of inundation, establishes preliminary planimetric survey controls, generates contour maps at close intervals, carries out aerial photogrammetric Survey using UAVs. He is presently the Principal Consulting Surveyor for the Team.
