To whom it may concern ,

I write to you this letter of recommendation for Alexis Nicole Whitney for Queen Mother II of the Americas. I am certain that she can and will do an amazing job upholding the core values of the International Court System and Council as Queen Mother .

We reigned during Covid together and held our positions for two years managing to raise \$67,000 for our charities , I know firsthand that once she sets her mind on a goal she diligently pursues it to be successful . Being visually impaired has not kept her from achieving goals and aspirations. Instead, it has fueled her to strive for perfection in everything she does.

After our reign we were honored with Monarchs of the Decade along with the Jose Honors Award. She then continued her work by joining the Council of Heirs in service not only for our community here in Houston but also throughout the Nation. That's when I knew one day she could be Queen Mother after having a small vision years ago that she could be Queen Mother I now see it as possibility . I am her eyes and help guide her. She is my drag mother and a mother to many in our community. Watching her achieve her dreams has been so inspiring and critical to helping me find my own path and journey in this life. For that I am grateful. Even with no vision, she saw something in me as well as others . She continues to be a voice for the Trans community and was honored this past May here in our city , I'm excited to see her keep fighting for LGBTQ + causes .

In closing, please take Alexis Nicole Whitney into consideration and know that her disability will not hinder her ability to reign and lead the organization. I, with all my being, have no doubts that she can and

will get the job done as I have witnessed time and time again. Thank you for all you do and may love and light bless you .

Sincerely,

Mykey Whitney
