CLINIX.NYC® CURRUST™

MEDICAID NEMT PROGRAM DRIVER REGISTRATION

- Medicaid transportation services are crucial for ensuring that beneficiaries can access the healthcare services they need to maintain a healthy quality of life. These services provide non-emergency medical transportation (NEMT) for Medicaid beneficiaries, facilitating their travel to and from medical appointments and improving health outcomes by removing transportation barriers.

- The **CLINIX.NYC CURRUST™** Medicaid NEMT Ride-Share program is dedicated to providing these essential services to Medicaid patients, particularly in underserved communities. This initiative not only aims to eliminate transportation barriers but also seeks to employ residents from these communities, thereby empowering the community both clinically and economically. This prescription aligns with the goals of the *Affordable Care Act of 2010*.

Currently, **CLINIX.NYC CURRUS™** is recruiting community residents to join the Medicaid NEMT Ride-Share program as drivers. As a driver with **CLINIX.NYC CURRUS™**, you will be employed to use your own vehicle for NEMT services. The program offers a base salary of \$40,000 per annum, benefits after six months of continuous satisfactory employment, and profit-sharing at the end of the year for non-provisional drivers, paid as a year-end bonus. Additionally, various driver incentive packages are available.

COMPLIANCE AND QUALITY ASSURANCE AT CLINIX.NYC CURRUS™

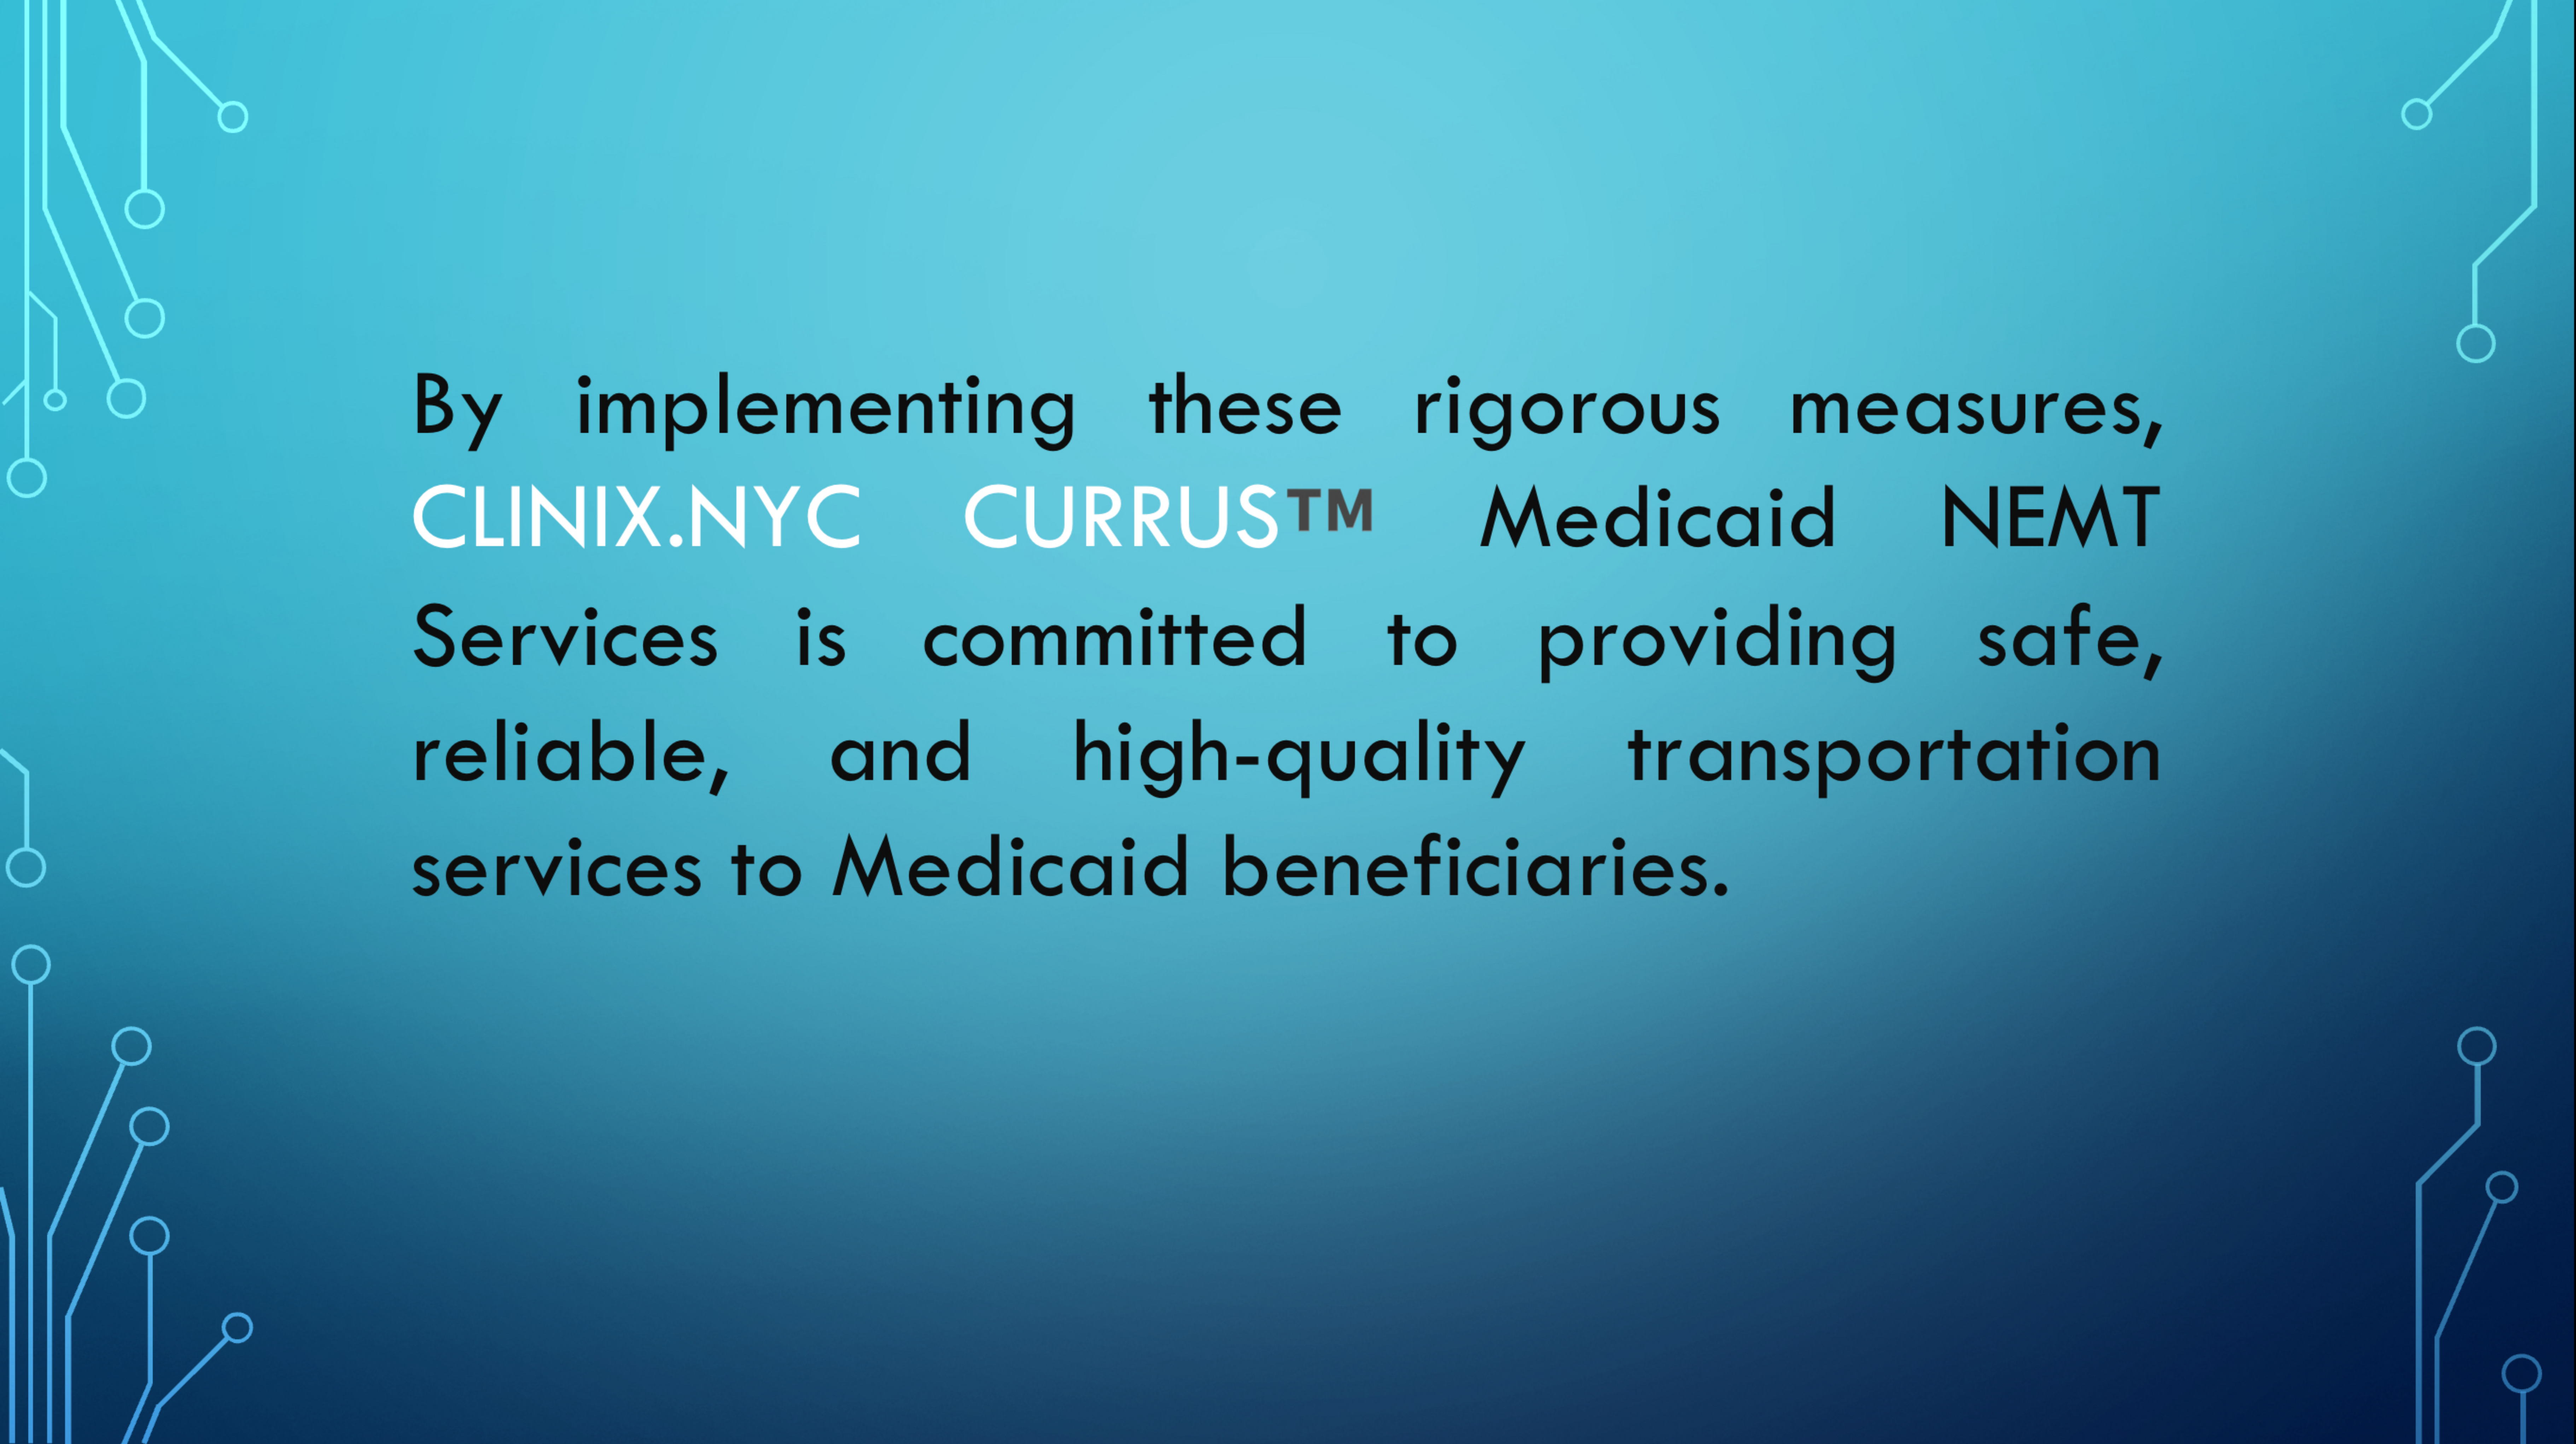

CLINIX.NYC CURRUS™ must adhere to federal and state regulations to ensure patient safety, service quality, and compliance with Medicaid program requirements. To maintain these high standards and continually improve service delivery, the following measures are in place:

Regular Audits and Performance Reviews: CLINIX.NYC CURRUST™ conducts frequent audits and performance reviews to uphold high standards and enhance service delivery.

Driver and Vehicle Standards: Utilizing best-in-class technology, CLINIX.NYC CURRUST™ ensures that all drivers meet the required qualifications and performance standards. Additionally, vehicles must meet specific program requirements, including maintaining high standards and adequate insurance coverage.

Quality Assurance Technology: Advanced quality assurance technology and digital-biometric verification are used to confirm each Medicaid beneficiary's ride on a per event/trip basis.

Compliance Review Audits: Regular weekly and monthly compliance review audits are conducted to uphold the highest service standards and to deter and eliminate fraud within the Medicaid NEMT transportation services delivery system.

The background features a dark blue gradient with white circuit-like lines in the corners. These lines consist of straight segments connected by small circles, resembling a network or data flow diagram.

By implementing these rigorous measures,
CLINIX.NYC CURRUS™ Medicaid NEMT
Services is committed to providing safe,
reliable, and high-quality transportation
services to Medicaid beneficiaries.

Understanding the Importance of Medicaid Transportation Services

Medicaid transportation services are a vital component of the healthcare delivery system, ensuring that vulnerable, underserved populations have regular access to essential medical care. By addressing operational challenges and leveraging innovative solutions, these services can be optimized to enhance patient experiences and health outcomes. The **CLINIX.NYC CURRUS™** Medicaid NEMT Ride-Share program is designed not only to eliminate barriers to accessible transportation but also to empower underserved communities and their residents both clinically and economically, in alignment with the dynamic goals of *the Affordable Care Act of 2010*.

Key Features of the CLINIX.NYC CURRUS™ Medicaid NEMT Ride-Share Program

High Volume of Services: CLINIX.NYC CURRUS™ drivers transport thousands of patients weekly, ensuring widespread access to healthcare.

Advanced Technology and Support: Drivers utilize state-of-the-art technology on the CLINIX.NYC platform and receive exceptional driver support.

Competitive Compensation: With profit-sharing, CLINIX.NYC CURRUS™ drivers are compensated better than the industry standard for NEMT Ride-Share program drivers.

Policy Compliance: Drivers must comply with all program policies, rules, and requirements, maintaining a satisfactory record for at least six months as a provisional driver to become a permanent employee, receive benefits, and qualify for year-end profit sharing.

ADA Certification: Drivers must be ADA (Americans with Disabilities Act) certified, which includes pre-employment drug and alcohol testing and random testing throughout the year.

Training and Testing Arrangements: The program arranges online ADA training and schedules all pre-employment drug testing on the CLINIX.NYC platform.

Valid Documentation Required: Applicants must possess a valid driver's license with no suspensions or revocations, current car insurance, and up-to-date vehicle registration and inspection certificates.

How to Register

If you meet all the requirements to become a CLINIX.NYC CURRUSTTM Medicaid NEMT Ride-Share program driver and are interested in joining our team, please register below on this CLINIX.NYC website:
