

# HELP US TO FIND YOU IN CASE OF AN EMERGENCY

IDENTIFY YOUR HOME WITH A 911 REFLECTIVE HOUSE SIGN

DINGMAN TOWNSHIP requires that you identify your home with a reflective numbered sign. This is reflected in the Zoning Ordinance Section 705.7. This sign must have 3 inch reflective numbers mounted on a post at the beginning of your driveway, a minimum of 4 feet and a maximum of 6 feet high. We have been supplying the area with just the thing. Our signs have 3 white numbers on a 6 inch by 18 inch BLUE REFLECTIVE aluminum plate. We can also provide a post if you do not have any place to mount it. As a service to our elderly and disabled residents installation is available upon request.

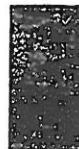

For more information or to place an order:

# Dingman Township has Enhanced-911!

## What is Enhanced-911?

Under the old 911 systems, the caller must dial 911. When the 911 operator answers the telephone, the callers must identify themselves, state the nature of the emergency, and then proceed to give detailed directions site of the emergency. (For example, the caller might have to give instructions such as ...enter Blue Sky Estates, go down Cloudy Road about ¼ mile past the lake, look for the second green house on the left). In the excitement of the emergency, many people forget the directions or give incomplete directions. Emergency personnel may be misdirected or delayed in getting to the site. Our large number of seasonal residents and visitors only compounds the problems.

**Under the Enhanced-911 system, the caller must dial 911. When the 911 operator answers the telephone, the caller's address instantly appears on the screen! Emergency personnel are immediately dispatched to the exact location where the emergency is taking place.**

## The E-911 program can only work with your help!

In order for E-911 system to function, each property has received a unique address that involves a number and a street name. (For example, 104 Cloudy Road).

## You must identify your property!

The best E-911 system is not good enough if the emergency personnel cannot find your house! Therefore, it is very important that you place a sign at the end of the driveway indicating your property number. Signs must be made of reflective material. The numbers should be at least 3 inches high and blocky for easy reading. Signs should be placed no lower than 4 feet above ground and no higher than 6 feet above ground.
