The company regularly identifies and introduces to the market, technology solutions which help meet the specific IT needs of the region. The key missions of the company are fast and efficient service delivery and high customer satisfaction.

OPPORTUNITIES

Identify problems and opportunities.

Many security consulting firms focus solely on electronic security solutions. Skykart Solutions takes a holistic approach to security in which all security elements fit together in a harmonious proactive and cost effective whole. Skykart Solutions security designs involve a "concentric layers of protection" approach. Its evaluations explore the interior and exterior built environment, from a prevention and observation perspective. Also considered are site perimeter, access points, core asset distribution, physical security, electronic security, key control, guard force management, workplace violence, executive protection, policies, procedures, training and more. To work effectively, these devices elements must function like one to form a comprehensive security explores facility design options first and only then looks at electronics security solutions to supplement a good security design.

BUSINESS CONCEPT

As IP-based video surveillance technology becomes more prevalent, the competitive advantage now lies with IT integrators who control their customer's networks. A shift to IP means a shift to the network where our network integrators run the show.

Our network integrator readers not only are trusted and "own" their customers' networks, they have the IT skills to design networks that can support video data and integrate cameras and access control with their customers' other information systems.

Skykart Solutions will project manage the expert installation of your security components and ensure that the result is a cost effective, high-performance system with minimal inconvenience to your business.

Our after-sales service will certify that your system continues to operate at the peak of its performance for years to come and won't leave you vulnerable.

We can also provide training in the operation of your system to ensure you have the expertise required to get the most from your setup.

GOALS AND OBJECTIVES

Security you can trust: At Skykart Solutions we're passionate about the provision of innovative, high quality security solutions, personalized to meet your requirements.

COMPANY PROFILE

With Skykart Solutions you can rest assured you will have the tailored security solution required by your organization.

Skykart Solutions provides peace of mind for your business.

Skykart Solutions Concepts' experienced team of professionals is focused on providing you with a service to which others aspire. We work closely with our clients from the initial consultation through to the implementation of our recommended solutions and ongoing technical support to maximize results.

Skykart Solutions Concepts has the ability to respond to your immediate and future needs and achieve your objectives by providing an ongoing personalized service.

Integrity: We listen to what our clients say and always put their requirements at the forefront of our solutions. We aim to give you confidence in our knowledge and experience so you can trust our advice and guidance.

EXPERTISE

Skykart Solutions Concepts provides guidance and solutions that are driven by the constant changes in technology. We ensure our team maintains the knowledge and skills that are essential to keep pace with all the technological developments in our industry.

An Individual Service: We begin by gathering detailed information about your business. We analyze the data and complete a thorough site survey. We present a detailed proposal of individually tailored solutions to meet your needs with no hidden costs. We implement the agreed solutions and provide comprehensive training. We offer a program of ongoing maintenance, service and technical support. We are constantly on hand to provide up to date, free advice on the further development and augmentation of your system.

CUSTOMER SUPPORT

Skykart Solutions Concepts offer a comprehensive Service & Maintenance Contract at competitive rates so that you can depend on each component of your security system operating at its optimum. A skilled technician will conduct a preventative maintenance visit confirming your system is performing at its optimal.

Peace of Mind: As the purpose of a security system is to provide protection for your business, it makes sense to maintain your system at peak performance.

Saving Money: Regular servicing of equipment will also ensure maximum component life and minimize the risk of system failures occurring.

Skykart Solutions Concepts will also undertake a thorough service of all your system's components.

This includes: Camera connections, Performance and focus check, camera coverage and movement (if applicable) Performance of the system recording device and control units, Quality of playback / retrieved images (CCTV)

Complete a full site and lighting assessment, test power supply and back-up unit condition and performance.

Provide a detailed service report.

Provide advice and answer user queries.
