

Camera surveillance consent

West Michigan Ketamine Clinics is responsible for you and your safety during your therapy sessions with us. New surveillance cameras have been placed in each of the patient rooms to ensure your safety. We DO NOT record or save any audio or video with this surveillance. The cameras are on a secured network within this office, and only your care team today will be looking at the surveillance during the infusion to provide best quality of care.

I give West Michigan Ketamine Clinics the consent to have me under surveillance during my infusion session today.
