## About the Property

A fully gated, architecturally reimagined Silver Lake estate offering rare privacy and resort-style living. Architecturally reimagined in 2023/2024, the home was rebuilt to the studs and expanded with a new second story, totaling 2,773 sq. ft. The property also includes a newly built two-story 809 sq. ft. ADU and a newly constructed heated saltwater pool, spa, and baja shelf, framed by mature trees, privacy hedging, and new hardscape. Located within the Ivanhoe School District and moments from the Silver Lake Reservoir and neighborhood dining and shopping, the home offers tranquility without compromise. The main residence features two true primary bedroom suites (one upper level, one lower level), an additional upstairs bedroom, a downstairs den opening to an outdoor dining area, multiple decks, and a flexible bonus space for office, gym, or storage. Past the newly landscaped front yard and custom iron front door, the home opens to a living room with an updated fireplace and chimney, flowing into a chef's kitchen with slim-shaker soft-close cabinetry, Calacatta Taupe Quartzite counters and island, Zia Zellige backsplash, Rejuvenation hardware, Newport Brass fixtures, and a Thermador appliance suite. The dining area overlooks Cyprus trees and the pool, with a nearby flexible room for office or family use. Upstairs features the upper-level primary suite in a private wing with walk-in closet, balcony, and spa bath with Calacatta Gold marble dual vanity, Kohler rain shower, and Zia Zellige tile, plus an additional bedroom, hall bath with Crema Breccia finishes, and full laundry with custom cabinetry and LG stackable washer/dryer. The lower-level primary suite includes a Crema Marfil marble vanity and direct access to the den and backyard. Exterior features include a newly built heated saltwater pool with three linear fountains, Akuza Sky porcelain tile backsplash, removable pool safety fence, Ipe railing, Saltillo exterior flooring, new irrigation, mature Ficus and Carolina Cherry hedges, smooth plaster perimeter walls, and a remote- and app-controlled driveway gate. Additional improvements include upgraded and new foundations, new roof and insulation, new ABS sewer lines with sump pump and ejectors, new plumbing, new 200-amp electrical system with smart wiring and EV charger, dual-zone HVAC with Nest thermostats, Marvin fiberglass-clad wood windows and accordion doors, concrete driveway, and smart dimmers throughout.
