

Pluralsight Cloud Ready

Build the team capabilities your cloud strategy depends on

Cloud adoption is only the first step. Without the skills to execute, organizations struggle to get value from their investment. Cloud Ready closes capability gaps so you can unlock AI at scale and turn cloud spend into measurable ROI.

Request a demo

Cloud investments are underdelivering

88% say cloud value at risk

91% wasted spend

1 in 2 organizations miss ROI

88% of orgs say their cloud investment levels put cloud-native, AI, and modernization initiatives at risk.¹

91% of organizations struggle with avoidable cloud spend ("cloud waste").²

1 in 2 organizations don't see the outcomes they want from cloud investment.²

Built for the future

Make progress inevitable in cloud and AI

Pluralsight Cloud Ready includes two platform-specific solutions—Cloud Ready for AWS and Cloud Ready for Azure.

These plans enable CIOs and CTOs to move critical initiatives forward with clarity and control, ensuring teams are prepared to deliver.

Request a demo

Gain visibility into team readiness

Build a clear, actionable plan to close skills gaps before initiatives stall.

Move AI from pilot to production

Strengthen cloud foundations and foster production-ready team skills.

Improve cloud performance

Reduce waste, optimize usage, and align skills to business priorities.

Before spending more, know what's holding you back

Assess your cloud maturity and ROI in 4 minutes—and get a clear path to improvement.

Start assessment

Build cloud capability

Move your cloud transformation forward with the right skills

Your teams learn in real AWS or Azure environments with a curriculum aligned to your business goals and day-to-day work. The result is faster execution and clearer impact.

Request a demo

Hit deadlines

Accelerate cloud migrations and modernization with structured, self-paced learning and real-world practice.

Unlock cloud ROI

Achieve agility, scalability, and security with best-practice architecture, better cost management, and tighter business alignment.

Modernize for AI

Build AI- and cloud-native platforms that perform more efficiently and unlock valuable data.

A structured path forward

Cloud Ready grows cloud expertise at every stage

A three-level framework enables teams to go from core cloud knowledge to role-specific expertise and modern, cloud-native practices.

1. Cloud foundations

Assess cloud literacy and build core knowledge across essential AWS or Azure services.

2. Cloud specialization

Develop role-specific, practical skills to perform in cloud roles and prepare for certifications.

3. Cloud strategy

Apply cloud-native and AI skills like prompting, assisted scripting, and infrastructure generation.

What's included

Where Cloud Ready creates a real impact

Unlike one-size-fits-all learning platforms or third-party consultants, Cloud Ready combines role-based learning with deep, hands-on experiences.

Learning paths

Follow expert-curated learning paths tailored to high-impact cloud roles and in-demand skills.

Skill assessments

Measure cloud fundamentals with skill assessments to track proficiency and progress.

Hands-on learning

Develop real-world skills in cloud and AI labs, sandboxes, and a code-along workshop to reinforce learning and put skills into practice.

Certification prep

Practice for your next exam, whether it's AWS Certified Solutions Architect - Associate, Microsoft Certified: Azure Developer Associate, or something else.

Unlock real value

Close the cloud ROI gap

Big players can afford to burn budget to stay competitive and hit their goals. But the rest ask, "Why is our cloud spend so high, and yet not driving tangible ROI?"

Download the guide to see how leading teams make it work through expert talent, streamlined processes, and proven practices.
