# ABOUT ARTICHOKE FILM FACTORY

We are a group of passionate film makers with industry experience. Apart from producing in-house Feature films and short films, we cater all kinds of visual requirements like Corporate Interviews, Real Estate videos, Coverage of Events, Social Media visuals, Audio dubbing, etc.

As there are enormous filmmakers looking for trustable cine units or professionals who can convert their ideas into stunning visuals, our goal is to create High Quality visuals with all modern techniques and equipments at unbelievably cheap price.

Starting from Pre production, our creative team will help you to convert your ideas in to hollywood standard scripts, story boards and shoot schedules. We do have our post production and marketing team to help you get your product placed at the right spot to reach maximum viewers.

---

## STILL MISSING SOMETHING? LET US KNOW ABOUT IT...

## APPROVALS AND PERMISSIONS

In order to film your visuals in UAE, you will have to get necessary approvals from UAE government. We as a licensed company can help you get the necessary approvals and permissions to fulfil your shooting requirements from all Emirates as part of promoting and encouraging filmmakers to use the full potential.

**ARE YOU COMING TO UAE FOR A SHOOT?  
WELL YOU NEED TO HAVE A LINE PRODUCER!**

## LINE PRODUCTION SERVICES

To fulfil the business aspects of the physical production of films, you definitely needs to hire a Line Producer. Line Producers act as the 'line' between the 'above-the-line' costs, which relate to writers, producers, directors and cast, and the 'below-the-line' costs which include everything else, e.g., crew salaries, equipment rentals, development costs, locations, set design and construction, insurance, etc.

Once we receive the approved script, we will assess the likely 'below the line' cost of the production which involves breaking down the screenplay into a schedule - a timetable for the film shoot that shows how long it will take to shoot each scene. From this schedule we will accurately estimate the cost of each day's shooting, and produce a provisional budget estimating the total amount of funding required. Once the producer and executive producers have raised the required finance, the film can go into pre-production.
