

How to Help

Help advocate for your community or others if your town doesn't have a skatepark. The skateboarding community is huge and we are all here to help!

Skatepark costs have risen but their sizes have not.

Year Open	Average Size (sq ft)	Cost (adjusted)
-----------	----------------------	-----------------

2010	8,555	224,300
2011	8,723	198,800
2012	10,439	350,900
2013	12,439	264,800
2014	13,103	262,000
2015	11,333	290,400
2016	10,647	319,900
2017	9,061	424,200

“

Skateboarding, for most young skateboarders, is not a choice. It is a central part of who they are. They are compelled to skate. Communities try to legislate the skater away”

PARK COSTS

In the United States, a skatepark costs an average of around \$40-\$60 per square foot to create, plus any project cost factors.

The cost of an 8,000 square foot skatepark capable of serving a neighborhood of about 25,000 residents will cost around \$400,000

THE Skate-Park Problem

Unfortunately, skateparks are often overlooked when it comes to funding the creation of a new park. Since city governments provide little to no incentive to skatepark companies, there are few.
