## Our Purpose

The Sonny Walker Group is an educational consulting firm that is dedicated to working with black school leaders to help them navigate the challenges of running a school and promoting academic success for all students. We understand that black school leaders face unique obstacles in their roles, including systemic racism and bias, and we provide tailored support and resources to help them overcome these barriers.

Our services include leadership coaching, professional development, strategic planning, and equity audits. We work closely with school leaders to identify their specific needs and goals, and we develop customized plans to help them achieve success.

We also provide support for schools and districts to create a more inclusive and equitable learning environment for all students. This includes developing and implementing culturally responsive teaching practices, creating programs to address achievement gaps, and promoting diversity, equity, and inclusion at every level of the educational system.

At our company, we are committed to helping black school leaders thrive and succeed in their important roles, and to promoting equity and excellence in education for all students.

Onward,

Brent Mitchell Ed.S  
Managing Partner
