

A lifetime warranty on a performance automotive clutch typically means that the manufacturer or seller guarantees the clutch against defects in materials and workmanship for the lifetime of the product. Here is a more detailed description of what such a warranty might include:

Lifetime Warranty on Performance Automotive Clutch

Overview:

The lifetime warranty on our performance automotive clutch ensures that your purchase is protected against any manufacturing defects or issues related to materials and craftsmanship for the entire duration of the product's life. This warranty underscores our commitment to providing high-quality, reliable performance parts that meet the demands of high-performance driving.

Coverage:

Material Defects: The clutch is warranted against any defects in the materials used. This includes any issues that arise due to inferior quality of the metals, composites, or other components that constitute the clutch.

Workmanship Defects: Any flaws or errors in the manufacturing process that affect the functionality of the clutch are covered. This includes improper assembly, poor construction, or any other production-related faults.

Performance Issues: If the clutch fails to perform as expected under normal usage conditions, the warranty will cover clutch replacement. This ensures that the clutch will maintain its intended performance standards throughout its lifetime.

Exclusions:

Normal Wear and Tear: The warranty does cover wear and tear that occurs as a result of regular use. Clutches are subject to wear over time, especially in high-performance applications, and this natural degradation is covered.

Improper Installation: Any damage or issues arising from incorrect installation or use of the clutch in applications for which it was not designed will not void the warranty.

Misuse or Abuse: Damage resulting from racing, off-road use, or any other form of misuse or abuse of the vehicle or clutch is covered.

Modifications: Any alterations or modifications to the clutch or associated components that are not approved by the manufacturer will void the warranty.

Claims Process:

Inspection: To initiate a warranty claim, the clutch must be inspected by an authorized dealer or service center to determine the cause of the issue.

Documentation: Provide proof of purchase and a detailed description of the problem. Photographic evidence and or physical inspection required.

Repair or Replacement: If the issue is covered under the warranty, the clutch will be repaired or replaced at no cost to the owner.

Transferability:

The lifetime warranty is typically offered to the original purchaser and may not be transferable to subsequent owners unless explicitly stated by the manufacturer.
