

SSP Performance specializes in the manufacturing, repair, and service of Dual Clutch Transmissions. Our manufacturing and main distribution facility is located in Minnesota. We are the largest aftermarket company specializing in Dual Clutch Transmissions for Nissan, Mitsubishi, VW, Audi, Porsche, Lamborghini, and BMW in the world. We aim to offer the highest level of performance and customer service in the industry today.

SSP Performance is owned and operated by true motorsports enthusiasts. Our staff is highly trained and experienced in all facets of automotive service, and racecar preparation. From our in-house fabrication specialists, highly qualified sales associates, we truly love what we do for a living, and are happy to serve our customers every day.

Our customer service and DCT transmission experience are well documented, and highly regarded throughout the industry. We are extremely active on numerous automotive forums and are more than happy to share our knowledge and experience with just about anyone. We feel that helping the community is our way of giving back to the customers and vendors that have supported us for so long.

We have a long history of racing and product development experience, and much of what we learn on the track is directly transferred over to future parts development and eventually to our customer's street cars. This is what sets SSP Performance apart from our competition.

Specializing in Dual Clutch Transmissions allows us to concentrate on a select line of vehicles, and a select line of parts. Producing high quality transmission parts each day is no easy task, I assure you. Over the years, SSP Performance has essentially assembled a "Dream-Team" of employees and support staff. We at SSP Performance strive to offer our customers the highest level of customer service and support in the industry.
