

1) Locally Made Tools *Continued*

The Assembly Fixture will become the most invaluable production tool to utilize within the assembly process. It'll hold the Body Tubes in a fixed and stable position to allow for measuring and marking for intensely accurate incisions for Fin placement. The true value of the Assembly Fixture reveals itself during Gluing operations by establishing fixed alignment for a precise Fin installation.

Using a Hardwood to fabricate the Assembly Fixture is an important from a material stability standpoint. One must endeavor to use, Oak, Elm, or any other Hardwood to avoid warping of the Assembly Fixture.
