Fastvue Reporter for SonicWall

Get unprecedented visibility into internet usage and network security with easy-to-read reports and alerts, sent to those that need it.

TCNS

For Education

Monitor your school's internet usage for students accessing self-harm, extremist or inappropriate online content.

For Business & Government

Detect insider threats and increase workplace productivity with automated, management-friendly internet usage monitoring, reports, and alerts.

For IT Teams

Reduce troubleshooting time and get superior insights into bandwidth, security, and firewall policy issues.

Get the visibility you've been missing

Fastvue's reports and alerts highlight everything businesses, schools, and IT teams need to know about their network and internet use.

Clear, comprehensive reports

Everything you need to know about user activity, security issues and network use easily scheduled each day, week or month.
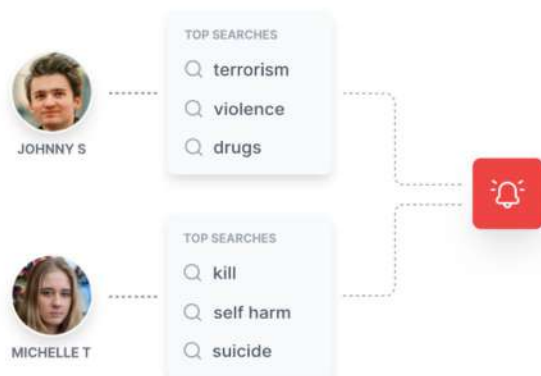

Site Clean

Fastvue's unique Site Clean technology lets you see exactly what websites are being browsed, without advertising, ugly content delivery networks, or other unnecessary noise cluttering the reports.

SITE DOMAIN	TOTAL SIZE

Productivity

Productive vs. unproductive. Acceptable vs. unacceptable. Create tailored guidelines that assess your users' browsing, so you can discover risky online behavior, identify lost productivity, or reward good digital citizenship.

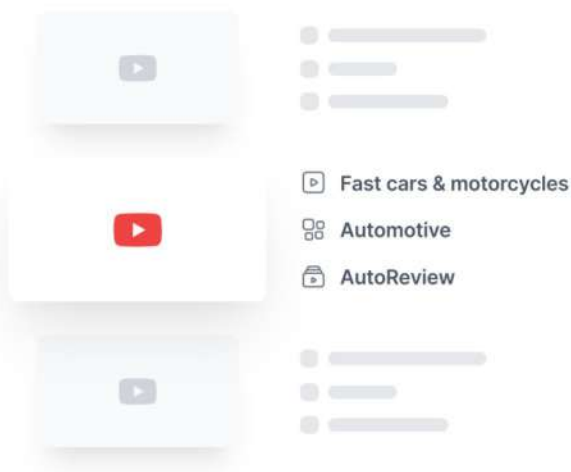

Dashboards

See what's happening on your network right now. Real-time dashboards focus on the trifecta of network concerns: bandwidth, productivity, and security.

YouTube monitoring

Clever keyword matching on YouTube titles lets you easily discover videos that may be inappropriate in your organization. See who spent time watching them, and how long.

Call TCNS on 0121 604 6224 to discuss your requirements in more detail or email sales@tcns.it

Connect your SonicWall

Send syslog date from the Vendor specified Firewall to the Fastvue Server

Enjoy better visibility

Get a more comprehensive view of your internet and network usage with easy-to-use reporting and real-time alerts.

*Available as Windows Server software or as a Linux Docker image.

"Fastvue Reporter is able to intelligently interpret the firewall's log files and extract detailed user activity on the web, during any particular timeframe. This produces clear reports that can be sent to safeguarding officers in real-time or on a schedule."

Paul Wilmore
Director of Technical services, Stonyhurst College
