**Hello, Friends!**

## **POLOMA AND CREE ARE BACK!**

After two bouts of covid and the loss of my father in 2022, my writing was kind of in the crapper for a good part of the year. But just like our favorite PWF heroines, I fought my way back. And it feels so, so good to be back in storytelling mode!

As a writer, there's nothing better than when characters and story turns surprise us. We can have an idea of what is going to happen. But that can be very different once the story unfolds and the characters are moving along with their own ideas of where they want to go. It can be a little like herding a pack of puppies.

That definitely was the case with this book. I was pretty sure when I started that Poloma was done with love for awhile. Boy oh boy was I wrong!

And I'm beyond excited to share this full-length edition of the first book in the Hoodoo Roses series that focuses on a family of women who learn to use their family hoodoo practice as they explore love and life after 40. It's heartfelt, fun, steamy...all the stuff that makes PWF romance books so much fun to dive into.

I hope you fall in love with them all over again. The book is available at all the usual outlets. And in the coming weeks, that will include more indie bookstores. [Buy Here!](#)
