

Standard Bark Nuggets 25mm

Our Standard Bark Nuggets 25mm is a mixed grade nugget that contains a combination of smaller nuggets and cambium bark, with a particle range between 10-25mm. This bark nugget creates a more "natural" looking finish on your garden, is less decorative than our Premium Bark Nuggets, but still looks great. During the refining process the nuggets also pass through our state of the art wash plant to remove stones and other impediments

This is our fine grade Standard Bark Nugget option, there is also a coarser grade that is 25-55mm should you prefer a larger particle size for your project. Our Standard Bark Nuggets are also **CSS Bark Mulch - Normal Grade approved**

Benefits

- Conserves moisture in the soil
- Protects plants roots from weather extremes
- Cost effective way to cover large areas
- Used as a weed suppressant when applied at 75-100mm

Recommended Use

- Residential garden beds and borders
- New subdivisions and roundabouts
- Parks and reserves
- Exposed bunds and slopes

Compliance

- Processed through a wash plant - stone free
- Processed and stored on sealed surfaces
- CSS Bark Mulch - Normal Grade approved

Inputs

- Pine Bark

Product Specifications

- Nominal Particle Size 10-25mm
- Particles 5-30mm >80%
- Particles <2mm <10%
- particles >20mm <10%
- Wood Chip % <25%
- Inorganic Component <1%
- Bulk Density 300kg/m3

Standard Bark Nuggets 25mm offers a more premium option than the recycled wood mulch options, at an affordable price. With the high percentage of cambium blended through this helps bind the particles together and make an excellent mulch option.
