

# Tree Pit Mix Bio

Tree Pit Mix Bio provides a cost-effective option for natural growing environments, suitable for basic tree planting needs for residential street trees, parks, reserve trees and large planters.

This mix provides an ideal growing medium that supports healthy root development, ensures proper drainage, and enhances nutrient availability. For more urban environments where a higher specification is required the Tree Pit Mix Boost or Hydro-Boost options may be more suitable.

## Benefits

- Balanced pH
- Assists with healthy root development
- Excellent soil structure
- Organic nutrient rich

## Compliance

- CSS Tree Pit Mix - Normal Grade approved
